¹Relative Seniority is the percentage of supplemental groundwater rights having a priority date that is the same as or later than the priority date listed. 0% equals least senior right. 100% equals most senior right. This value is duty-based and is an indicator of permit's position relative to a % curtailment scenario.

Permit data compiled from Nevada Division of Water Resources' Permit database in June, 2015.

All data contained herein are provisional and subject to revision at any time. Water rights are not static. They may be subject to change applications, certification, withdrawal, forfeiture and cancellation. Each of these actions could impact the duty associated with a given water right.
