Required Courses

The required Regulation and Forms course will remain a four-hour course, three hours covering the regulations portion and one hour covering the forms portion. You will receive 4 Continuing Education Units (CEU's) for attending this course. All well drillers can check the status of their license, which will show how many CEU's they have, and if they need the required Regulations and Forms course at <http://water.nv.gov/ContinuingEducation.aspx/>

This course is required every other renewal period. Additional opportunities to attend the Regulations and Forms courses can be found on our website. For more information on an event hosting the Regulations and Forms courses, please visit that specific event's website.

You must attend the Regulation and Forms Course in its entirety to obtain credit for the required course.

New Well Drilling Regulations were approved for 2021. A copy of the new approved regulations can be found on our website at water.nv.gov > programs > 2020 Adopted Regulations Compiled (Unofficial).

According to the newly adopted regulations, 24-hour notices are now required for all well drilling work (not just plugging). Please email your 24-hour notices to ndwrdrilling@water.nv.gov. This does not include reconditioning work or pump work.
