ABSTRACT

This inventory represents the status and pumpage of all permitted, certificated and claims of vested right groundwater rights located within Las Vegas Valley, Hydrographic Basin 13-212, for calendar year 2014 (January 1, 2014 through December 31, 2014). Also included is data associated with depth to groundwater.

The data presented are valid for the time period of this report, and may vary from previously published data as water rights within the basin are subject to administrative action, such as certification, cancellation, forfeiture, or withdrawal on a daily basis.

For calendar year 2014 the permitted, certificated and claims of vested right groundwater rights totaled **87,246 acre-feet**. Estimated pumpage for the water year was **82,140 acre-feet**. Municipal and quasi-municipal are the largest manner of uses within the basin. For calendar year 2014, appropriations for municipal and quasi-municipal totaled 60,277 acre-feet and the pumpage was 64,749 acre-feet (including 4,411 acre-feet of recharge recovery). The next largest manner of use was recreation with appropriations totaling 5,534 acre-feet and the pumpage was 5,776 acre-feet. The next largest manner of use was pumping by domestic use and exempt domestic wells, at 4,914 acre-feet. Exempt domestic wells are defined by Nevada Revised Statutes 534.013 and do not require a permit issued by the State Engineer.

NOTE: Committed groundwater resource data are accurate for April 2015. Manner of use category totals vary over time, as water rights (rights) are not necessarily static. Rights may be subject to change applications, certification, withdrawals, forfeiture and cancellations; each of these circumstances could impact the duty, diversion rate and acreage associated with a given right.

*Includes pumpage by exempt domestic wells, as defined by NRS 534.013. The domestic use estimate is based upon a count of the total domestic wells in the basin multiplied by 1 acre-foot per annum. The number of domestic wells in the basin was estimated by a query of the [Nevada Division of Water Resources' Well Log Database](#) and is estimated to be 4,527.

PURPOSE AND SCOPE

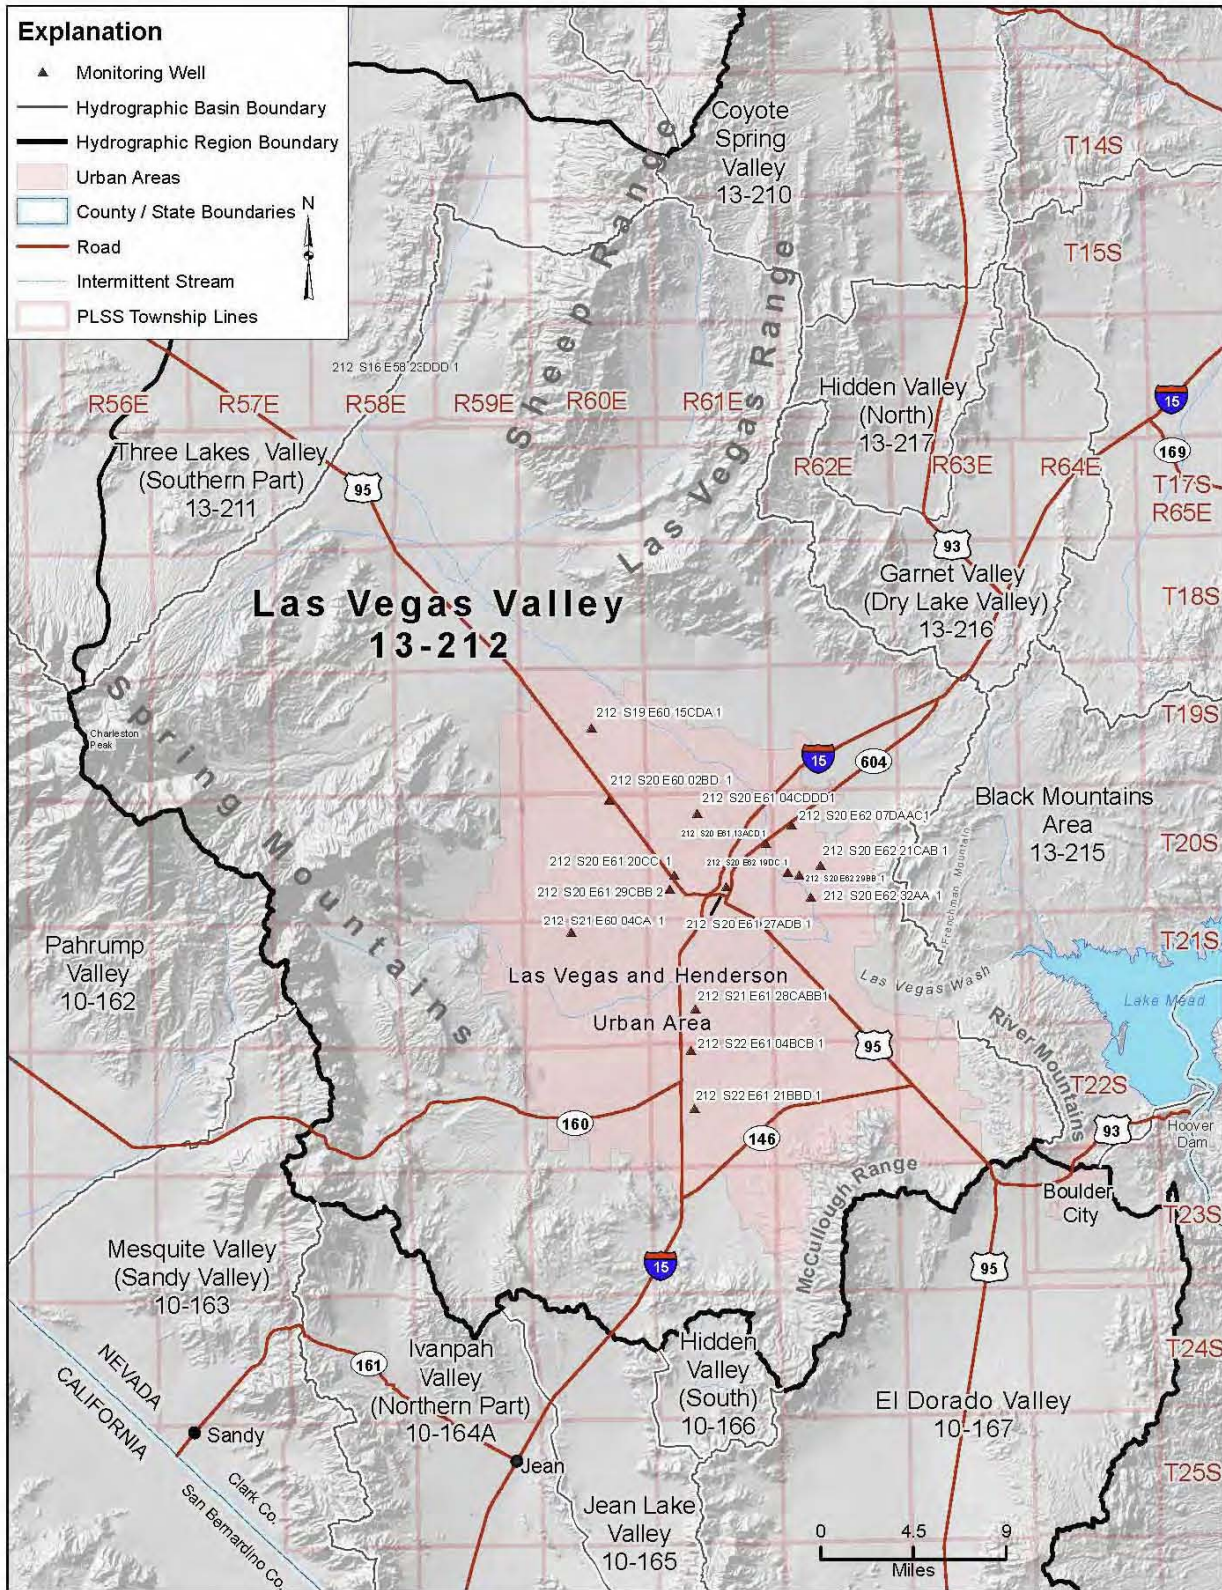

The purpose of this report is to inventory all of the groundwater resources allocated and described by the Office of the State Engineer, Nevada Division of Water Resources, and to estimate the amount of groundwater pumped within the Las Vegas Valley Hydrographic Basin 13-212, for the calendar year 2014. This report estimates the amount of groundwater pumped under the permits and certificates issued by the State Engineer, claims of vested right, and the amount pumped by exempt domestic wells within the basin. Associated information, such as groundwater level measurements, is also presented.

DESCRIPTION OF THE STUDY AREA

Las Vegas Valley is a basin located in southern Nevada. The valley is approximately 35 miles west of the Hoover Dam, and is within the Colorado River Hydrographic Region. Las Vegas, the most populated city in Nevada, is the principal community. The basin is located within Clark County (see Figure 1).

The Las Vegas Valley basin is approximately 1,564 square miles in size. The highest point is Charleston Peak with an altitude of 11,918 feet, and the lowest point is where the Las Vegas Wash flows out of the basin at around 1,450 feet. The Las Vegas Valley is bounded on the west by the Spring Mountains; on the north by the south parts of the Sheep and Las Vegas Ranges; on the east by Frenchman Mountain and other low lying ranges; and on the south by the River Mountains and McCullough Range. Most of the groundwater supply is generated from precipitation that falls on the Spring Mountains and Sheep Range. The valley is topographically closed except for Las Vegas Wash to the southeast which drains into Lake Mead. The adjacent Nevada hydrographic basins are as follows: Pahrump Valley, 10-162, to the west; Three Lakes Valley (Southern Part), 13-211, to the north and northwest; Coyote Spring Valley, 13-210, to the north; Hidden Valley (North), 13-217, to the northeast; Garnet Valley (Dry Lake Valley), 13-216, to the northeast; Black Mountains Area, 13-215, to the east; Eldorado Valley, 10-167, to the southeast; Hidden Valley (South), 10-166, to the south; Jean Lake Valley, 10-165, to the south; Ivanpah Valley (Northern Part), 10-164A, to the southwest; and Mesquite Valley (Sandy Valley), 10-163, to the southwest. The exterior boundary of the Las Vegas Valley Hydrographic Basin is as described by Designation Orders 175, 182, 189, 249, 275, 833 issued by the Nevada State Engineer on January 10, 1941, February 29, 1944, November 22, 1946, April 18, 1961, May 25, 1964, and December 27, 1983, respectively.

Figure 1 Monitoring Well Location Map of Las Vegas Valley Hydrographic Basin 13-212

GROUNDWATER LEVELS

Depths to groundwater in Las Vegas Valley have been measured by the Nevada Division of Water Resources consistently since the early 1950's. There are sixteen (16) active sites and ninety two (92) inactive sites in the monitoring well network. The following are the site names and links to the data (refer to Figure 1 for monitoring well locations):

Groundwater level data are currently being collected by the USGS (data may be accessed through the USGS website <http://nevada.usgs.gov/>). Data retrievals are organized by hydrographic basin.

Groundwater level data is also collected by the USGS, SNWA, CNLV, and CLV (data may be accessed through those agencies websites).

IMPORTED WATER

Las Vegas Valley Water District (LVVWD) is the primary water purveyor in Las Vegas Valley. LVVWD uses both surface and groundwater resources diverted from within the basin to meet the municipal supply demand. LVVWD also imports surface water from a neighboring hydrographic basin for use within its service area. Colorado River surface water has been imported from the Black Mountains Area Basin to the Las Vegas Valley Basin since 1942, when a pipeline was constructed from Lake Mead to the Basic Magnesium Project to support the war effort. Prior to 1955, the City of Henderson and Basic Management, Inc. (BMI) were the only areas in the valley served by imported Colorado River water. In 1955, LVVWD began purchasing water from BMI for public supply purposes. In 1971, the Southern Nevada Water Project became operational and large-scale importation of Colorado River water to the valley became possible. During calendar year 2014, a total of **282,638 acre-feet** of surface water was imported for use within the LVVWD service area.

The City of Henderson (CoH) is also a water purveyor in Las Vegas Valley. CoH imports Colorado River surface water for use within its service area. During calendar year 2014, a total of **77,243 acre-feet** of surface water was imported for use within the CoH service area.

The City of North Las Vegas (CNLV) is also a water purveyor in Las Vegas Valley. CNLV uses both surface and groundwater resources diverted from within the basin to meet the municipal supply demand. CNLV also imports Colorado River surface water for use within its service area. During calendar year 2014, a total of **46,235 acre-feet** of surface water was imported for use within the CNLV service area.

In summary, a total of **417,556 acre-feet** (including BMI, Nellis Air Force Base, and system losses) of surface water were imported for use within the Las Vegas Valley during calendar year 2014. See Appendix D, Table 5.

RECHARGE, STORAGE AND RECOVERY PROGRAM

The Las Vegas Valley Water District (LVVWD) operates an aquifer recharge storage and recovery program in Las Vegas Valley. This project is associated with Nevada State Engineer's Recharge Permits R-001, R-003, and R-012, and has been in operation since 1987. Treated Colorado River water is injected into transmissive units of the principal aquifer via seventy-eight (78) injection wells primarily in the central and northwest parts of the Las Vegas Valley. No recharge was conducted by LVVWD during calendar year 2014. State Engineer's Order No. 1176 (In-Lieu Recharge) was issued on December 10, 2004 and allows credit for pumping less than the permitted groundwater rights that a municipal water purveyor possess. Said order allows 85 percent of non-pumped groundwater allocation to be recovered in the future, while 15 percent of the water remains in the aquifer. During calendar year 2014, LVVWD recovered **3,921 acre-feet** of existing in-lieu recharge. Another **490 acre-feet** of recharge was recovered under the program during calendar year 2014 by the Las Vegas Paiute Tribe, per agreement with LVVWD and SNWA.

The City of North Las Vegas (CNLV) operates an aquifer recharge storage and recovery program in Las Vegas Valley. This project is associated with Nevada State Engineer's Recharge Permits R-007 and R-008, and has been in operation since 1990. Treated Colorado River water is injected into the principal aquifer via eight (8) injection wells. No recharge was conducted by CNLV during calendar year 2014. State Engineer's Order No. 1176 (In-Lieu Recharge) was issued on December 10, 2004 and allows credit for pumping less than the permitted groundwater rights that a municipal water purveyor possess. Said order allows 85 percent of non-pumped groundwater allocation to be recovered in the future, while 15 percent of the water remains in the aquifer. During calendar year 2014, CNLV did not recover any existing in-lieu recharge and earned an in-lieu recharge credit of **1,227 acre-feet**.

EFFLUENT

Several agencies operate wastewater treatment facilities within the Las Vegas Valley area. The Clark County Water Reclamation District (CCWRD) operates two (2) wastewater treatment facilities; the City of Las Vegas (CLV) operates three (3) wastewater treatment facilities; the City of Henderson (CoH) operates two (2) wastewater treatment facilities; and the City of North Las Vegas (CNLV) operates one (1) wastewater treatment facility. All of these facilities treat wastewater received from sewer connections, including residential, hotel, commercial, and industrial users. The treated effluent is then either discharged into Las Vegas Wash or is pumped to other uses. All of the wastewater in the Las Vegas Valley is reclaimed - most of which via Colorado River System return flow credits into Lake Mead, and some is directly reused as treated effluent for irrigation on golf courses and parks or other industrial uses. Use of the effluent for irrigation or other uses is authorized by the Nevada State Engineer under secondary permits. For calendar year 2014, a total of **19,120 acre-feet** of effluent were delivered for reuse in the Las Vegas Valley.

METHODS TO ESTIMATE PUMPAGE

This report estimates the amount of groundwater pumped under the permits and certificates issued by the Nevada State Engineer as well as claims of vested right and exempt domestic wells in the Las Vegas Valley Hydrographic Basin. The following methods were used to arrive at the estimated use:

- Where totalizing meters are in place, meter readings were taken and compared with previous data (if available).
- Where meters were not in place and the use was irrigation, pumpage was estimated by multiplying the number of hours the well was operated during the past year (determined from an hour meter reading or asking the water user) by the certificated diversion rate.
- Where there are no flow meters or other reliable options for estimating pumpage and the use was irrigation, the method will be to divide the Net Irrigation Water Requirement (NIWR) for the crop grown by the efficiency of the irrigation method used, then multiplied by the amount of acres irrigated. Irrigation efficiencies associated with three (3) types of irrigation methods are as follows: pivot at 85%, wheel line or other hand moved sprinklers at 75%, and flood at 60%. The pumpage amount estimated by this method will not exceed the duty of the permit. For places of use where there are groundwater rights supplemental to surface water, the field personnel will use their professional judgment to estimate the amount supplied by groundwater for the year. Evapotranspiration and NIWR data by basin can be found on the Nevada Division of Water Resources website at: http://water.nv.gov/mapping/et/et_general.cfm.
- Where meters were not present, previous data were not available, and the manner of use was not irrigation, pumpage was estimated by applying the annual duty associated with the certificate (if the water right was perfected), permit or claim, if the use was as described in the certificate, permit or claim. If the use was not as described in the certificate, permit or claim, a value was estimated based upon the circumstances of use for the subject year.
- If no water was used under the certificate, permit or claim, zero pumpage was recorded.
- Exempt domestic wells may be drilled and utilized where water service from a purveyor is not available. These types of wells do not require a permit from the State Engineer if they do not pump more than 2 acre-feet per year as provided by Nevada Revised Statutes (NRS) [534.180](#). [NRS 534.013](#) defines this category of domestic use as follows: “*Domestic use or domestic purposes extends to culinary and household purposes directly related to a single family dwelling, including, without limitation, the watering of a family garden and lawn and the watering of livestock and any other domestic animals or household pets.*” The number of exempt domestic wells in the basin is determined by a query of the Nevada Division of Water Resources' Well Log Database. The amount of water pumped by exempt domestic wells is estimated to be 1.0 acre-foot per well in Las Vegas Valley.

PUMPAGE BY MANNER OF USE

Note that all data herein are estimates and are subject to revision. The total estimated groundwater pumpage for calendar year 2014 was **82,140 acre-feet**. The annual duties of the certificates, permits and claims of vested right within the Las Vegas Valley Hydrographic Basin totaled **87,246 acre-feet**. The appropriated and actual pumped totals, categorized by manner of use, are as follows:

A. Municipal & Quasi-Municipal (MUN & QM)

During calendar year 2014, appropriations for municipal and quasi-municipal purposes totaled 60,277 acre-feet in the basin. An estimated 64,749 acre-feet (including 4,411 acre-feet of recharge recovery) of groundwater was pumped during calendar year 2014.

B. Environmental (ENV)

During calendar year 2014, appropriations for environmental purposes totaled 11,122 acre-feet in the basin. An estimated 2,595 acre-feet of groundwater was pumped during calendar year 2014.

C. Recreation (REC)

During calendar year 2014, appropriations for recreation purposes totaled 5,534 acre-feet in the basin. An estimated 5,776 acre-feet of groundwater was pumped during calendar year 2014.

D. Irrigation (IRR)

During calendar year 2014, appropriations for irrigation purposes totaled 4,515 acre-feet in the basin. An estimated 2,157 acre-feet of groundwater was pumped during calendar year 2014.

E. Mining & Milling (MM)

During calendar year 2014, appropriations for mining & milling purposes totaled 2,261 acre-feet in the basin. An estimated 585 acre-feet of groundwater was pumped during calendar year 2014.

F. Commercial (COM)

During calendar year 2014, appropriations for commercial purposes totaled 1,838 acre-feet in the basin. An estimated 923 acre-feet of groundwater was pumped during calendar year 2014.

G. Industrial (IND)

During calendar year 2014, appropriations for industrial purposes totaled 829 acre-feet in the basin. An estimated 263 acre-feet of groundwater was pumped during calendar year 2014.

H. Domestic (DOM)

During calendar year 2014, appropriations for domestic purposes totaled 401 acre-feet in the basin. An estimated 387 acre-feet of groundwater was pumped during calendar year 2014. Also, records of the State Engineer indicate an estimated 4,527 exempt domestic wells existed in the basin during calendar year 2014. The amount of water pumped for that domestic use as described under NRS 534.013 is estimated at 4,527 acre-feet. Therefore, the total amount of water pumped for all domestic uses during calendar year 2014 was 4,914 acre-feet.

I. Other (OTH)

During calendar year 2014, appropriations for other purposes totaled 346 acre-feet in the basin. An estimated 22 acre-feet of groundwater was pumped during calendar year 2014.

J. Wildlife (WLD)

During calendar year 2014, appropriations for wildlife purposes totaled 123 acre-feet in the basin. An estimated 156 acre-feet of groundwater was pumped during calendar year 2014.

¹From records of the Las Vegas Valley Water District.

²From records of the Division of Water Resources.

³Does not include credit from Artificial Recharge.

⁴Includes credit from Artificial Recharge.

^aDuty assigned to each domestic well ranges from .5 to .99 acre-feet per year.

^bDuty of 1.61 acre-feet per year assigned to each domestic well.

^cDuty of 1.0 acre-foot per year assigned to each active domestic well.

^dRevised from previously published figures.

^eIncludes recovery of artificial recharge.

^fNumber of domestic wells adjusted per GIS well inventory.

^gIncludes recovery of artificial recharge by Paiute Tribe.

¹From revised records of the Nevada Colorado River Commission.

²First water delivered June 16, 1971.

³Colorado River water diverted through Basic Management pipe line not used by Park Service or Henderson.

⁴Includes losses from the Southern Nevada Water System, 4,176 acre-feet.

⁵Does not include 14,415 acre-feet diverted for testing of the Southern Nevada Water System.

⁶Colorado River water diverted through the Basic Management pipeline and used by the City of Henderson, does not include deliveries to the Lake of Las Vegas development in Black Mountain Basin, 2,875 acre-feet in 2014.

⁷Revised from previously published figures.

⁸Colorado River water diverted through Basic Management pipeline and used by Las Vegas Valley Water District.

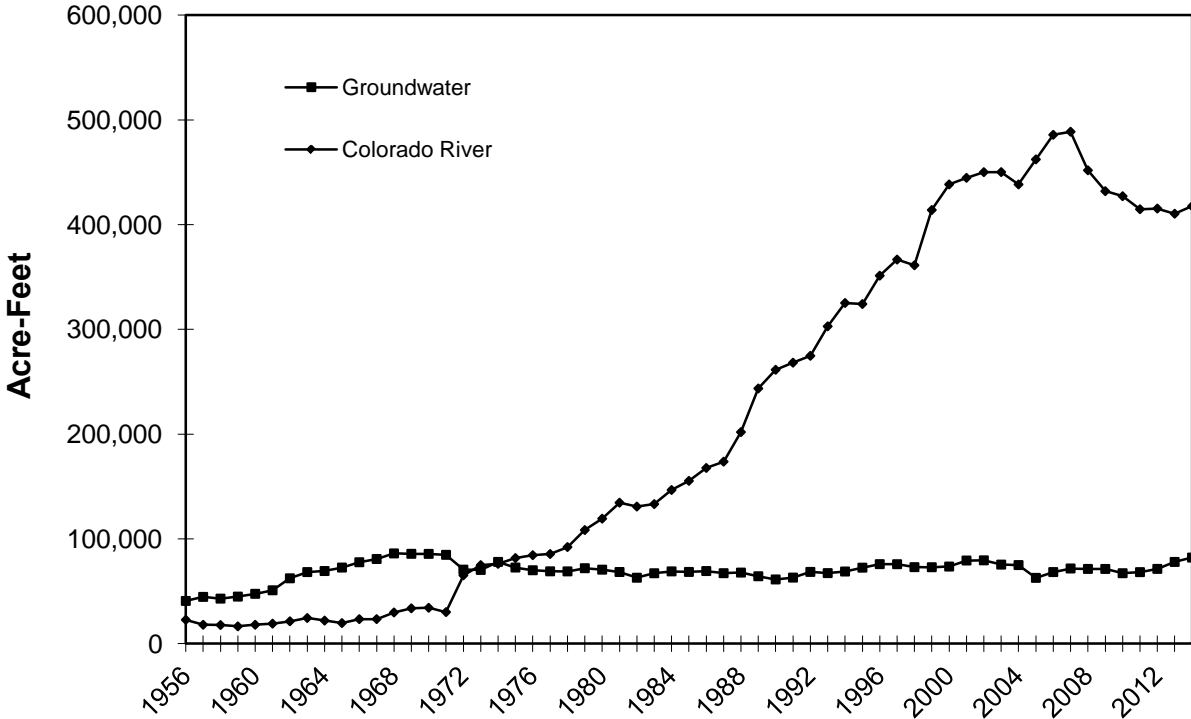

Figure 8. Annual groundwater and Colorado River water usage for Las Vegas Valley, 1956-2014.

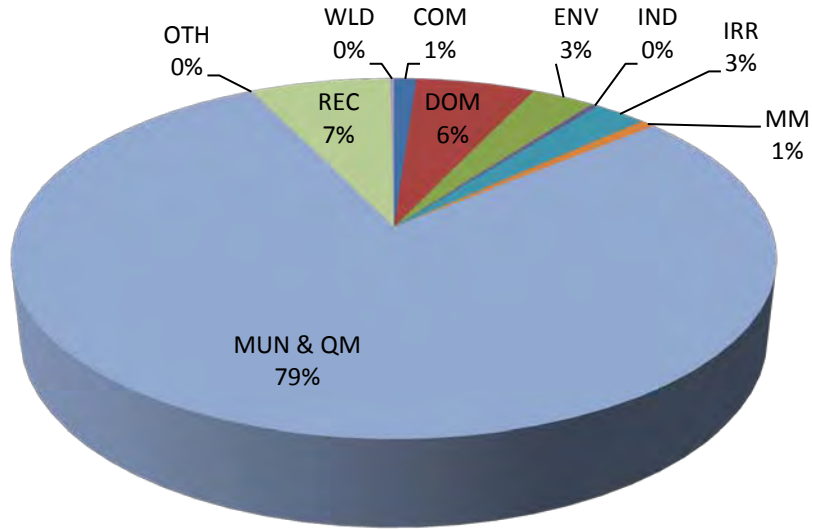

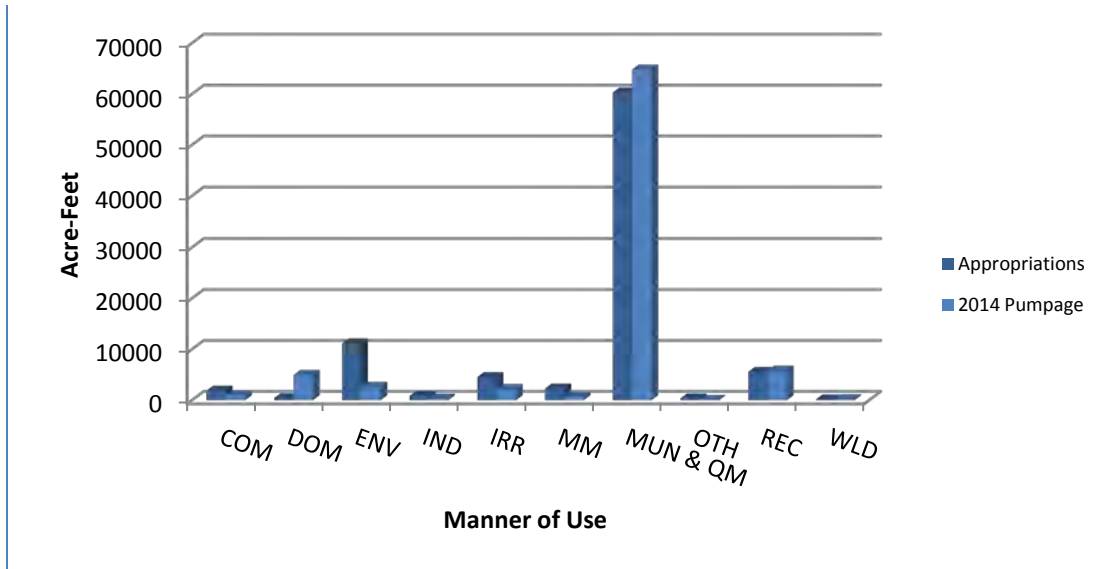

Figure 9. Annual water usage for Las Vegas Valley, 1956-2014.

FOR CALENDAR YEAR 2014**

Explanation of Column Headings for Effluent Water Reuse Inventory

NUMBER	The file number of the Application.
STA	Status of the application: Permit (PER) or Certificate (CET).
OWNER OF RECORD	The owner of the water right as recorded in the files of the State Engineer. A water right may have more than one owner of record.
LEGAL	The Township - Range - Section in which the point of diversion is located.
US	Manner of use of appropriated water. The types of manner of use may include: ID – Industrial MN – Municipal RC – Recreation IR – Irrigation PO – Power ST – Storage
DUTY	The amount of water allowed under the permit(s).
PUMP14	The amount of water used during the calendar year, in acre-feet, as determined by meter readings, review of records and/or field investigation.
METHOD	METER = meter readings; FIELD = field investigation and/or review of records.
DATE	Date of field investigation or year meter readings were taken.
REMARKS	Abbreviations used: CFS = cubic feet per second.
