Re: Data Information Request to WRID/Your Letter of September 6, 2011 requesting clarification

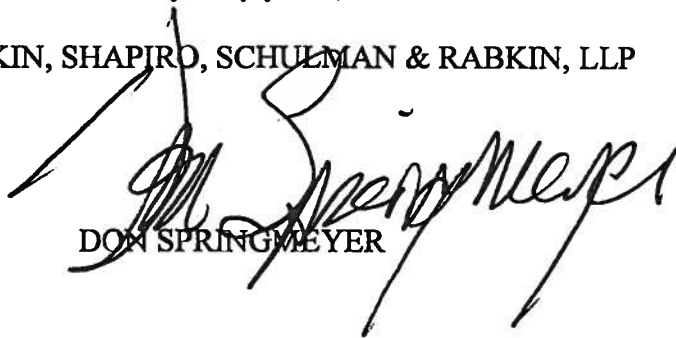

Dear Gordon:

This letter responds to yours of September 6, 2011 requesting clarification regarding item #4. This is our reformulation of item #4 in an attempt to be as clear and specific as possible:

4. For each ditch/POD in the District we request what amounts to an aggregated "water card" that includes: (a) natural flow decree water rights including acres and CFS by date of priority and total; (b) supplemental storage water rights including apportioned acres and acre-feet by date of priority and total; and (c) New Land storage water rights including apportioned acres and acre-feet. It would make the model more accurate, and more useful to all parties in the short and long runs, if we also had the low- and high-duty acreage breakouts in each instance.

Very truly yours,

WOLF, RIFKIN, SHAPIRO, SCHULMAN & RABKIN, LLP
