Re: **Data Information Request to Walker River Irrigation District in Connection  
With National Fish and Wildlife Foundation Change Application No. 80700  
Our File No. 1709.0239**

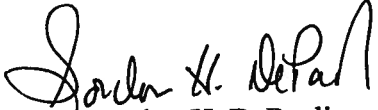

Dear Don:

In your letter of September 2, 2011 requesting certain information from the Walker River Irrigation District (the "District"), you asked that the District provide its position on your requests by September 15, 2011. I am not prepared to provide the District's position on all of your requests at this time. However, we are not ignoring your requests.

We are working with the District's personnel to determine the nature and extent of information that the District has which is responsive to your requests. We are also exploring the options available to allow the District to extrapolate the information you have requested from the information it does have, but which may not be in the format which you have requested.

As soon as we have additional information concerning both the District's position on the information requested and the availability of data, I will let you know. In any event, I will be back to you on this matter on or before September 30, 2011.

Sincerely,

  
Gordon H. DePaoli
