Re: Tom Myers Model Data Files

Dear Mr. Felling:

Following up on our conversation yesterday, enclosed are two disks (identical copies) containing the two folders of Tom Myers' MODFLOW data files that were inadvertently omitted from the disks of data files we submitted on July 1st. The two folders are named "modflow spring steady state" and "modflow spring snwa pumping 60 kaf w recovery"; the former contains 38 individual files and the latter contains 21 individual files.

Please accept my apologies for this accidental omission and my thanks for bringing it to my attention promptly. I am following up with all of the other parties, and sending copies of the same folders to those who say they are missing from the data disks they received, too.

Sincerely,

Simeon Herskovits

Encl.
