Re: Additional Tom Myers Model Data Files Requested By SNWA

Dear Mr. Felling:

At the request of Simeon Herskovits, I am enclosing two disks (identical copies) each containing two additional folders of data files related to Tom Myers' groundwater model that hydrologists for the Southern Nevada Water Authority requested from Dr. Myers and that we agreed to provide.

The two folders are named "evt files 72711" and "modflow spring transient calibration." The former contains 7 individual files and the latter contains 24 individual files. Dr. Myers has indicated that the contents of these folders are self-explanatory, but please do not hesitate to contact him if you have any questions.

We are sending identical disks containing the same folders of data files to all of the other parties, as well.

Sincerely,

Noel Simmons

Encl.
