DATE:		9/26/11

RECEIVED  
 2011 SEP - 1 PM 2:32  
 STATE ENGINEER'S OFFICE

**SOUTHERN NEVADA WATER AUTHORITY'S MOTION IN LIMINE TO EXCLUDE  
 EXPERT REPORTS BY MAYER (DDC EX. 501), KRUEGER  
 (DDC EX. 539 AND DDC EX. 559), AND SCOPPETTONE (DDC EX. 609)**

The Southern Nevada Water Authority ("SNWA") requests that the State Engineer issue a pre-hearing order excluding DDC Ex. 501, DDC Ex. 539, DDC Ex. 559, and DDC. Ex. 609 (collectively, the "Non-Testifying Federal Expert Reports") from evidence. This motion is made pursuant to the State Engineer's hearing regulations (LCB File No. R129-08 sec. 2 (eff. Feb. 11, 2009)) and the State Engineer's Third Amended Informational Statement (June 6, 2011).

The State Engineer should exclude the Non-Testifying Federal Expert Reports because the authoring witnesses will not testify and thus will not be subject to cross-examination. These reports are hearsay prepared in anticipation of litigation and do not fall within a recognized hearsay exception. Admission of the Non-Testifying Federal Expert Reports without witnesses to cross-examine deprives SNWA of its right to due process and violates the State Engineer's regulations. In addition, the reports are not subject to administrative notice.

SNWA asks that the State Engineer issue an order excluding the Non-Testifying Federal Expert Reports before the hearing, rather than withhold a decision until the exhibits are offered into evidence. SNWA must present its witnesses first and is not guaranteed a rebuttal case.

Without a pre-hearing ruling of exclusion, SNWA will be placed in the untenable position of either having its witnesses discuss the very exhibits SNWA is trying to exclude or risk losing the opportunity to rebut the exhibits at all should they come into evidence during the protestants' cases over SNWA's objection.

**I. STATEMENT OF FACTS.**

**A. The Administrative Hearing.**

For the upcoming hearing, the State Engineer ordered the parties to exchange initial exhibit lists and witness lists no later than July 1, 2011. *In re Apps. 53987–53992 & 54003–54021*, Notice of Pre-Hearing Conf. & Hearing, at 4 (April 1, 2011). The State Engineer ordered that “[i]f a witness is not identified in the exchanges as testifying on direct as to a certain topic, the witness will not be allowed to testify to the un-identified topic in his or her direct testimony.” *Id.* He also ordered that “[if] a witness is to be presented to provide expert testimony, the evidentiary exchange shall include a written report prepared and signed by the witness, which shall contain a complete statement of all opinions to be expressed and the basis and reasons for those opinions . . . .” *Id.*

On July 1, 2011, Protestant Great Basin Water Network (“GBWN”) submitted its exhibit list. *In re Apps. 53987–53992 & 54003–54021*, GBWN Ex. 077 (July 1, 2011). GBWN’s document disclosure identified the following exhibits, which are the subject of this motion:

- Timothy Mayer, *Hydrologic Assessment of SNWA Water Right Applications for Delamar, Dry Lake, and Cave Valleys in the White River Flow System* (Nov. 14, 2007), DDC Ex. 501 (“Mayer 2007”)
- Jeri Krueger, *Status of Southwestern Willow Flycatcher in the White River Drainage, Nevada* (Nov. 13, 2007), DDC Ex. 539 (“Krueger 2007a”)
- Jeri Krueger, *Migratory Birds on Pahrnagat National Wildlife Refuge, Nevada* (Nov. 13, 2007), DDC Ex. 559 (“Krueger 2007b”)
- G. Gary Scoppettone, *Ichthyologic Assessment of SNWA Water Right Application for Delamar, Dry Lake, and Cave Valley in the White River Flow System* (Nov. 15, 2007), DDC Ex. 609 (“Scoppettone 2007”)

GBWN, however, did not disclose Timothy Mayer, Jeri Krueger, or G. Gary Scoppettone as witnesses. *See In re Apps. 53987–53992 & 54003–54021*, GBWN Ex. 076 (July 1, 2011).

**B. Mayer 2007.**

Dr. Mayer was a Hydrologist for the U.S. Fish and Wildlife Service at the time he prepared Mayer 2007. Dr. Mayer describes his report as “Expert Witness Testimony.” Mayer 2007 at 1. Under a heading entitled “Testimony,” Mayer 2007 describes the White River Flow System and the Pahranaagat National Wildlife Refuge. Mayer 2007 at 2–4. Dr. Mayer directly addresses SNWA’s proposed pumping in Cave, Dry Lake, and Delamar Valleys (“DDC”) as described in a 2001 report. *Id.* at 3. Dr. Mayer criticizes SNWA’s calculation of groundwater recharge, *id.*, and estimation of groundwater evapotranspiration in Delamar and Dry Lake Valleys, *id.* at 6. He also disputes SNWA’s groundwater accounting in the White River Flow System. *Id.* at 7–11. He recommends granting SNWA the right to pump a reduced amount in Cave Valley and requiring monitoring. *Id.* at 12.

**C. Krueger 2007a.**

Ms. Krueger was a Fish and Wildlife Biologist for the U.S. Fish and Wildlife Service at the time she prepared Krueger 2007a and Krueger 2007b. In Krueger 2007a, Ms. Krueger describes the habitat and history of the Southwestern Willow Flycatcher in Nevada, including its listing as an endangered species. Krueger 2007a at 1–2. She opines that flycatchers probably require quiet waters for their habitat. *Id.* at 3. She states that flycatchers are threatened by habitat loss caused by dams, reservoirs, diversions, and groundwater pumping. *Id.* She states that vegetation is directly affected by groundwater supplies and that riparian trees are highly sensitive to changes in groundwater levels. *Id.* at 4.

///

**D. Krueger 2007b.**

Krueger 2007b describes the Pahrangat National Wildlife Refuge, which serves as a refuge for migratory birds, including some sensitive species. Krueger 2007b at 1–2. She opines that the surface waters in Pahrangat Valley and White River Valley are important to migratory birds. *Id.* at 3. She opines that loss of habitat plays a major role in population decline of birds and that one of the greatest threats comes from alteration of hydrology, including the use of groundwater by Las Vegas. *Id.* at 3–4. She states that migratory birds may be critically threatened by over-allocation of groundwater in the Colorado River Flow System. *Id.* at 4.

**E. Scoppettone 2007.**

Mr. Scoppettone was a Fishery Biologist for the U.S. Geological Survey when he prepared Scoppettone 2007. Scoppettone 2007 describes native fish in White River and Pahrangat Valleys, noting that some are listed as endangered. Scoppettone 2007 at 2–4.

In a section entitled “Expert Opinion,” Mr. Scoppettone opines that reduction in spring discharge in White River and Pahrangat Valleys threatens species persistence by causing flows to cool faster and reducing water volume. *Id.* at 5–6. He concludes that further habitat reduction is expected to cause more extinctions of Nevada’s unique fish. *Id.* at 6.

**F. The prior Spring Valley hearing.**

In the first Spring Valley hearing, the State Engineer required an evidentiary exchange and, as in the upcoming hearing, ordered that all testifying witnesses be indentified along with the topics of their testimony and that expert witnesses must provide signed expert reports. *In re Apps. 54003–54021*, Intermediate Order & Hearing Notice, at 11 (March 8, 2006).

On June 29, 2006, the U.S. Department of the Interior, on behalf of its Bureau of Land Management, Bureau of Indian Affairs, National Park Service, and Fish and Wildlife Service,

(collectively, the “DOI Protestants”) submitted its exhibit and witness lists. *In re Apps. 54003–54021*, DOI Witness & Ex. Lists (June 29, 2006).

On September 8, 2006, SNWA and the DOI Protestants entered into a settlement agreement by which the DOI Protestants agreed to withdraw their protests and not present a case, witnesses, exhibits, or statements, nor assist any other party in presenting the same. DOI & SNWA Stip. 6, 9 (Sept. 8, 2006). As part of the settlement, SNWA agreed not to object when the DOI Bureaus introduced certain exhibits, but the exhibits that are the subject of this motion were not included. *Id.* at 9.

At the hearing, Western Environmental Law Center (“WELC”), on behalf of several protestants, requested the State Engineer to take administrative notice of National Park Service Exhibits 2502, an expert report by William Van Liew (“Van Liew 2006”), and 2505, an expert report by Paula Cutillo (“Cutillo 2006”),<sup>1</sup> pursuant to Section 533.300 of the Nevada Administrative Code. *In re Apps. 54003–54021*, I Spring Valley Hearing 28:19–29:11 (Sept. 11, 2006). These reports were not included in the list of exhibits that SNWA agreed not to object to in its settlement agreement with the DOI Protestants. SNWA objected, arguing that these specific expert reports would lack a witness to provide foundation and undergo cross-examination. *Id.* at 29:14–23. WELC argued that these were government documents describing official matters observed pursuant to duties and investigative reports and were thus not considered hearsay under Section “51.555” of the Nevada Revised Statutes.<sup>2</sup> *Id.* at 29:24–30:8. The Hearing Officer sustained SNWA’s objection. *Id.* at 30:9–14.

---

<sup>1</sup> Dr. Cutillo’s report was initially identified as Exhibit 2504.

<sup>2</sup> The reference most likely was intended to be to Section 51.155, which reads:

Records, reports, statements or data compilations, in any form, of public officials or agencies are not inadmissible under the hearsay rule if they set forth:

1. The activities of the official or agency;
2. Matters observed pursuant to duty imposed by law; or

During John Bredehoeft's testimony for the protestants, he began to discuss information related to Cutillo 2006. *In re Apps. 54003–54021*, X Spring Valley Hearing 1652:7–13 (Sept. 22, 2006). SNWA objected, arguing that Cutillo 2006 was not evidence in the record. *Id.* at 1652:14–1653:1. SNWA argued that testimony on this matter was inappropriate because no witness was available to provide foundation and be subject to cross-examination. *Id.* at 1653:4–14. The Hearing Officer again sustained SNWA's objection. *Id.* at 1656:3–4.

**G. The prior DDC hearing.**

In the first DDC hearing, the State Engineer required an evidentiary exchange and, as in the upcoming hearing, ordered that all testifying witnesses be indentified along with the topics of their testimony and that expert witnesses must provide signed expert reports. *In re Apps. 53987–53992*, Intermediate Order No. 1 & Hearing Notice, at 16 (Oct. 4, 2007).

On November 15, 2007, the DOI Protestants submitted their exhibit and witness lists. *In re Apps. 53987–53992*, DOI Witness & Ex. Lists, Ex. 500 (Nov. 15, 2007). The lists disclosed that Timothy Mayer would testify as an expert in hydrology and disclosed his written expert report, Mayer 2007. *Id.* at 1–2, 5. The DOI Protestants also disclosed ecology expert Jeri Krueger, and fish expert Gary Scoppettone along with their expert reports, Krueger 2007a, Krueger 2007b, and Scoppettone 2007. *Id.* at 2–3, 8–9, 13.

On January 7, 2008, SNWA and the DOI Protestants entered into a settlement agreement by which the DOI Protestants agreed to withdraw their protests and not present a case, witnesses, exhibits, or statements, nor assist any other party in presenting the same. DOI & SNWA Stip. 5, 7 (Jan. 7, 2008). Thus, Dr. Mayer, Ms. Krueger, and Mr. Scoppettone never testified.

---

3. In civil cases and against the State in criminal cases, factual findings resulting from an investigation made pursuant to authority granted by law, unless the sources of information or the method or circumstances of the investigation indicate lack of trustworthiness.

Nev. Rev. Stat. § 51.155.

On January 18, 2008, SNWA filed a written motion in limine to exclude, inter alia, evidence submitted by the DOI Protestants and testimony regarding the same. *In re Apps. 53987–53992*, SNWA Mot. in Limine (Jan. 18, 2008). SNWA specifically sought exclusion of Mayer 2007, Krueger 2007a, Krueger 2007b, and Scoppettone 2007, noting that the protestants had referenced these reports in their own expert reports. *Id.* at 6–7. SNWA argued that the remaining protestants did not identify the DOI exhibits in their initial and secondary disclosures of witnesses and exhibits and asked the State Engineer to exclude the DOI exhibits pursuant to Section 533.280(2)<sup>3</sup> of the Nevada Administrative Code and his Intermediate Order No. 1. *Id.* at 1–2, 4–5. SNWA also argued that the DOI exhibits should be excluded because there would not be witnesses to provide foundation and there would be no opportunity to cross-examine the DOI experts. *In re Apps. 53987–53992*, SNWA Mot. in Limine at 6.

On February 4, 2008, during the DDC hearing, the Hearing Officer ruled that SNWA’s motion in limine was premature until the specific exhibits were offered. *In re Apps. 53987–53992*, I DDC Hearing 67:19–22 (Feb. 4, 2008). During examination, the protestants’ witness, Thomas Myers, testified that he relied on Mayer 2007, in forming his opinion and the protestants offered it into evidence. *In re Apps. 53987–53992*, VI DDC Hearing 1260:18–1261:4 (Feb. 11, 2008). SNWA objected, arguing that the DOI Protestants agreed not to offer their exhibits and that Dr. Mayer was not present to testify and so could not attest to the content of the report nor be subject to cross-examination. SNWA also noted that an expert report was different than a public record of a federal agency. *Id.*

The Hearing Officer ruled that Mayer 2007 was a public record in the State Engineer’s office and would be admitted as a document that Dr. Myers relied on to form his expert opinion.

---

<sup>3</sup> At the time, Section 533.280(2) read: “If a party fails to comply with a prehearing order to identify or exchange exhibits and the lack of notice would result in prejudice to the opposing party, the state engineer may refuse to accept the exhibit into evidence.” Nev. Admin. Code § 533.280(2).

However, the Hearing Officer noted that it would not carry much weight. *Id.* at 1263:3–9; 1265:5–13. The Hearing Officer admitted Krueger 2007a, Krueger 2007b, and Scopettone 2007 over a similar objection, noting that they will not be accepted as expert witness reports but will be admitted into evidence as documents relied on by the protestants' expert, Dr. James Deacon. *In re Apps. 53987–53992*, VIII DDC Hearing 1575:11–1579:16 (Feb. 13, 2008).

#### **H. Pre-Hearing Conference.**

On May 11, 2011, the State Engineer conducted a prehearing conference for the upcoming hearing. During the prehearing conference, the State Engineer denied the protestants' request to incorporate the record from the prior hearings into the administrative record for the current proceedings. *In re Apps. 53987–53992 & 54003–54021*, Amended Third Informational Statement, at 3 (June 6, 2011). To make an exhibit from the prior Spring Valley and DDC hearings part of the administrative record in the upcoming hearing, a party must identify the exhibit as part of an evidentiary exchange. Then the exhibit can be offered into evidence, but its admission will be subject to challenge by the opposing party. Accordingly, the admissibility of Non-Testifying Federal Expert Reports is again ripe for consideration because the State Engineer has not taken administrative notice of the exhibits from the prior hearing and is requiring each prior exhibit to be offered into evidence and subject to the type of objection contained herein.

### **II. ARGUMENT.**

#### **A. Admission of the Non-Testifying Federal Expert Reports without appearances by the authors to undergo cross-examination violates SNWA's right to due process.**

Since water rights are property, the administration of water rights hearings is subject to the due process clauses of the Nevada and U.S. Constitutions. *See Mineral Cnty. v. State, Dept. of Conservation & Natural Resources*, 117 Nev. 235, 244, 20 P.3d 800, 806 (Nev. 2001)

("Nevada law treats water rights as real property."); *Engelmann v. Westergard*, 98 Nev. 348, 352, 647 P.2d 385, 388 (1982) (per curiam) (holding permittee's due process rights were not violated when he did not receive notice of cancellation of his water permits, thereby implicitly recognizing that water rights are property subject to due process). The due process clause prohibits State deprivation of "life, liberty, or property, without due process of law." U.S. Const. amend. XIV § 1; see also Nev. Const. art. I § 8 cl. 5. When important decisions such as the approval or denial of water rights are being made, due process requires that parties in administrative hearings be given an opportunity to cross-examine adverse witnesses if it is reasonably necessary for a full and true disclosure of the evidence. *Solis v. Schweiker*, 719 F.2d 301, 302 (9th Cir. 1983); see also *Richardson v. Perales*, 402 U.S. 389, 402 (1971); *Goldberg v. Kelly*, 397 U.S. 254, 269 (1970) ("In almost every setting where important decisions turn on questions of fact, due process requires an opportunity to confront and examine adverse witnesses."). "[B]asic notions of fundamental fairness and due process" require the State Engineer to provide full and fair administrative hearings. *Revert v. Ray*, 95 Nev. 782, 787, 603 P.2d 262, 264-65 (1979). The right to cross examination is of fundamental importance. *Bivens Constr. v. State Contractors' Bd.*, 107 Nev. 281, 283, 809 P.2d 1268, 1270 (1991) (reversing decision of administrative agency based on agency's limitation of cross examination).<sup>4</sup>

---

<sup>4</sup> See also *Eureka Cnty. v. State Eng'r*, Nos. CV-0904-122, CV-0904-123, & CV-0908-127, slip op. (Nev. 7th Judicial Dist. Ct. April 21, 2010), attached as **Exhibit A**. In *Eureka County*, the judicial district court reviewed the State Engineer's decision to approve several water permit applications filed by Kobeh Valley Ranch, LLC ("KVR") over Eureka County's protest. See *id.* at 3-4. The State Engineer had ordered pre-hearing disclosures. *Id.* at 5. As part of its disclosures, KVR disclosed a groundwater model. *Id.* After the disclosure period closed, the U.S. Bureau of Land Management modified the groundwater model. *Id.* KVR sought to introduce the original model and the modified model. *Id.* at 5-6. Eureka County objected because it was not prepared to conduct cross-examination on the undisclosed model. *Id.* at 6 & 8. The State Engineer's Hearing Officer ruled that the modified model would be part of the record, but that the State Engineer would not consider it. *Id.* at 8. Despite this, the State Engineer cited the modified model in his ruling. *Id.* at 8-9. On review, the district court noted that due process and fair play include the opportunity for meaningful cross-examination and that the lack of pre-hearing notice that the modified model would be used in the hearing and ruling violated Eureka County's right to due process. *Id.* at 10 & 14-15. The court vacated the ruling and remanded to the State Engineer for a new hearing. *Id.* at 16.

“The objective of a protest hearing is to develop a record upon which the State Engineer may rely to make a sound decision, without causing unnecessary delay and expense to participating parties or to the Office of the State Engineer.” Nev. Admin. Code § 533.180, *as amended by* LCB File No. R129-08 sec. 17 (eff. Feb. 11, 2009). Protest hearings before the State Engineer are not subject to the same formal procedural requirements as proceedings before courts of law. *See* Nev. Rev. Stat. § 533.365(6). However, in order to develop a record upon which the State Engineer may make a sound decision, due process requires the State Engineer provide SNWA a full and fair opportunity to confront witnesses and evidence offered against it.

SNWA is not asserting that it has the due process right to cross-examine the authors of *all* documents that the State Engineer may rely on in reaching his decision. Many of the documents the State Engineer is expected to rely on, such as peer-reviewed USGS publications and learned treatises, have special indicia of reliability. Cross-examination of their authors is not reasonably necessary to develop a full and true record. The four documents at issue, however, do not fall within this category. When experts offer opinions specifically developed to oppose SNWA’s water right applications, the contents of reports containing the expert opinions are highly prejudicial and lack indicia of trustworthiness. The admission of such documents without the opportunity to cross-examine the authoring experts violates SNWA’s right to due process.

While the rules of evidence do not technically apply in an administrative hearing before the State Engineer, Nev. Rev. Stat. § 533.365(6), the State Engineer may informally follow those rules at his discretion. However, since the State Engineer is required to comply with the Due Process Clause, to the extent the rules of evidence have a constitutional dimension, the State Engineer must comply with them. For this reason, the rules of evidence that govern hearsay represent a convenient standard against which to judge whether the admission of highly

prejudicial expert reports that lack indicia of trustworthiness violates SNWA's due process right to reasonable cross-examination.

In a court of law, expert reports—whether accompanied by live testimony of the author or not—are hearsay. *See* Fed. R. Evid. 801(c); Nev. Rev. Stat. § 51.035. As hearsay, they are inadmissible absent special indicia of reliability that place them within a hearsay exemption or an exception to the hearsay rule. *See* Fed. R. Evid. 801(d), 802; Nev. Rev. Stat. §§ 51.035, 51.065. Hearsay is primarily inadmissible because the declarant is not subject to cross examination.<sup>5</sup> V Wigmore, *Evidence* § 1362 at 3–10 (Chadbourn rev. 1974).

Exemptions and exceptions to the hearsay rule are carved out when circumstances furnish other guaranties of trustworthiness and live testimony is impractical. Fed. R. Evid. 807; Nev. Rev. Stat §§ 51.075, 51.315; *see also* 29 Am. Jur. 2d *Evidence* § 668; V Wigmore, *Evidence* § 1420 at 251–52. When such an exception or exemption does not apply, it is a good indication that cross-examination is reasonably necessary to develop a full and true record. Further, when hearsay does not fall into a recognized exemption or exception to the hearsay rule, it lacks special indicia of reliability, and therefore cross-examination is necessary for a fair hearing and is required by due process.

Exceptions to the hearsay rule demonstrate how the rules of evidence protect against due process violations by limiting admission of testimony not subject to cross-examination to strictly circumscribed situations. For example, under the learned treatise exception to the hearsay rule,

To the extent called to the attention of an expert witness upon cross-examination or relied upon by the expert witness in direct examination, a statement contained in a published treatise, periodical or pamphlet on a subject of history, medicine or other science or art, is not inadmissible under the hearsay rule *if such book is*

---

<sup>5</sup> Other reasons justifying exclusion of hearsay are that the declarant was not under oath and that the trier of fact cannot observe the declarant's demeanor. *See* 29 Am. Jur. 2d *Evidence* § 668 (2011); V Wigmore, *Evidence* § 1362 at 3–10 (Chadbourn rev. 1974).

*established as a reliable authority* by the testimony or admission of the witness or by other expert testimony or by judicial notice.

Nev. Rev. Stat. § 51.255 (emphasis added). The justification for the learned treatise exception is that the trier of fact may need to be educated on sciences and established published materials have been vetted by the scientific community and are therefore reliable. See VI Wigmore, Evidence § 1690, at 2 (Chadbourn rev. 1976).

In addition, under the official statement exception to the hearsay rule,

Records, reports, statements or data compilations, in any form, of public officials or agencies are not inadmissible under the hearsay rule if they set forth:

1. The activities of the official or agency;
2. Matters observed pursuant to duty imposed by law; or
3. In civil cases and against the State in criminal cases, factual findings resulting from an investigation made pursuant to authority granted by law, unless the sources of information or the method or circumstances of the investigation indicate lack of trustworthiness.

Nev. Rev. Stat. § 51.155. The justification for the official statement exception is that public officials do not have time to always testify at trials and the fact that the official acts pursuant to a legal duty ensures an extra level of trustworthiness. V Wigmore, Evidence 1631–32, at 617–19. To determine whether a report of an investigation is trustworthy, courts consider four factors: “(1) the timeliness of the investigation; (2) the investigator’s skill or experience; (3) whether a hearing was held; and (4) *possible bias when reports are prepared with a view to possible litigation.*” *Beech Aircraft Corp. v. Rainey*, 488 U.S. 153, 168 n.11 (1988) (emphasis added).

The rules of evidence also recognize that scientific and technical experts often rely on facts and data to develop their expert opinions that would normally be inadmissible in courts of law. An expert may base his opinion on facts or data “of a type reasonably relied upon by experts in forming opinions or inferences upon the subject” even if those facts or data are not admissible in evidence. Nev. Rev. Stat. § 50.285(2); see Fed. R. Evid. 703. Though the expert

need not disclose the underlying facts and data supporting his expert opinion, he may be required to by the judge or by the adverse party during cross-examination. Fed. R. Evid. 705; Nev. Rev. Stat. § 50.305.

Under the Federal Rules of Evidence, inadmissible underlying facts may even be disclosed to the jury, but only if “the court determines that their probative value in assisting the jury to evaluate the expert’s opinion substantially outweighs their prejudicial effect.” Fed. R. Evid. 703. In Nevada, admission is governed by the less-restrictive balancing test of Section 48.035, which states:

1. Although relevant, evidence is not admissible if its probative value is substantially outweighed by the danger of unfair prejudice, of confusion of the issues or of misleading the jury.
2. Although relevant, evidence may be excluded if its probative value is substantially outweighed by considerations of undue delay, waste of time or needless presentation of cumulative evidence.

Nev. Rev. Stat. § 48.035; *see Everett v. Town of Bristol*, 674 A.2d 1275, 1277 (Vt. 1996) (holding that Vermont’s version of Rule 703 “is not a ‘backdoor’ to circumvent the restrictions of other rules of evidence” and testimony regarding evidence relied on by experts is still subject to the balancing test for probative value versus unfair prejudice). Thus, though the exact balancing test varies by court, inadmissible evidence relied on by an expert witness does not automatically become admissible. Otherwise, parties would be encouraged to smuggle inadmissible evidence into the record through expert reliance on it. *See* David H. Kaye et al., *The New Wigmore, A Treatise on Evidence: Expert Evidence* § 4.7, 4.8, at 170–71 (2d ed. 2010).

Courts have applied balancing tests like Nevada’s to exclude evidence relied on by an expert witness that would be prejudicial. *See Nachtsheim v. Beech Aircraft Corp.*, 847 F.2d

1261, 1270–71 (7th Cir. 1988) (affirming exclusion of testimony regarding prior accident under Rule 403 even though expert witness relied on it to form opinion). Courts have also applied the less-restrictive balancing test to hold that it is error to allow a testifying expert to testify that a non-testifying expert reached essentially the same conclusions. *See United States v. Tran Trong Cuong*, 18 F.3d 1132, 1143–44 (4th Cir. 1994) (holding it was error to allow testifying physician to testify that another physician made the same conclusions).

Although the Non-Testifying Federal Expert Reports cover scientific and technical material, the learned treatises exception to the hearsay rule does not apply here. Though the Non-Testifying Federal Expert Reports became public when they were submitted to the State Engineer as part of the previous hearings, they have not been published in the traditional sense and therefore are not “learned treatises.” The reports have not gone through traditional peer review and editing processes. Nor have they been established as authoritative in their respective fields. They have not been circulated to the community of experts in their fields and subject to review and criticism. The Non-Testifying Federal Expert Reports were prepared for the administrative hearing before the State Engineer. They are advocacy pieces that lack indicia of trustworthiness. *See State v. Tapia*, 108 Nev. 494, 497, 835 P.2d 22, 24 (1992) (per curiam) (holding documents prepared in anticipation of trial do not fall under regularly kept casino records exception to hearsay rule); *see also Millenkamp v. Davisco Foods Int’l, Inc.*, 562 F.3d 971, (9th Cir. 2009) (holding that a letter did not fall under the regularly kept business records exception to the hearsay rule because it was prepared in anticipation of litigation); *Paddock v. Dave Christensen, Inc.*, 745 F.2d 1254, 1258–59 (9<sup>th</sup> Cir. 1984) (holding that audit reports did not fall under the regularly kept business records exception to the hearsay rule because they were prepared for the purposes of litigation and thus lacked indicia of trustworthiness); *People v.*

*Lonsby*, 707 N.W.2d 610, 619 n.9 (Mich. Ct. App. 2005) (“Because, for the reasons explained above, the disputed documents are both adversarial and were prepared in anticipation of litigation, they do not qualify under the business or public records exceptions to the hearsay rule.”).

The Non-Testifying Federal Expert Reports were authored by employees of the U.S. government. This fact alone, however, does not place them within the official statement exception to the hearsay rule. The circumstances of the investigation of the Non-Testifying Federal Expert Reports indicate a lack of trustworthiness. The Non-Testifying Federal Expert Reports were specifically prepared to oppose SNWA in the administrative proceedings before the State Engineer. These are—at least in part—advocacy pieces and not objective scientific papers. As noted above, because they were prepared in anticipation of the administrative hearings, they lack indicia of trustworthiness, and therefore do not fall under a hearsay exception. *See Beech Aircraft Corp.*, 488 U.S. at 168 n.11 (noting “possible bias when reports are prepared with a view to possible litigation” should be considered when determining trustworthiness); *Rockwell v. State*, 176 P.3d 14, 25 (Alaska Ct. App. 2008) (noting that passport and stamps were “not prepared in anticipation of litigation” in holding that they fell within the public records exception); *Lonsby*, 707 N.W.2d at 619 n.9.

None of the Non-Testifying Federal Expert reports appear to have been relied on by GBWN’s testifying experts as they do not appear in the references of GBWN’s expert reports. However, even if GBWN’s testifying experts relied on the Non-Testifying Federal Expert reports, the mere fact that other experts relied on a report does not render it admissible. To find otherwise would encourage parties to “smuggle” inadmissible evidence into State Engineer hearings by simply listing the evidence as a reference.

When the dangers of prejudice outweigh the probative value, the report must be excluded. *See* Fed. R. Evid. 703; Nev. Rev. Stat. § 48.035. In this case, the Non-Testifying Federal Expert reports contain opinion and conclusion rather than mere recitations of fact. The only way for SNWA to determine the underlying basis for the opinions, and to ensure full and true disclosure of evidence, is through cross-examination. SNWA will be greatly prejudiced if the Non-Testifying Federal Expert Reports are admitted.

Mayer 2007 contains several criticisms lodged at SNWA's applications. His opinions are prejudicial to SNWA because without the ability to cross-examine Dr. Mayer, SNWA cannot fully explore the basis of his opinions and whether or not they even apply to SNWA's current plans or whether they reflect the current scientific understanding of the hydrology of the relevant areas. Specifically, Mayer opines that the State Engineer should deny SNWA all water permits in Dry Lake and Delamar valleys and limit the amount approved in Cave Valley. Mayer 2007 at 10 & 12. This unexplored and now unassailable opinion is highly prejudicial to SNWA. Further, this opinion, and others, are four (4) years old and were not informed by the analysis contained in the Draft Environmental Impact Statement for the subject pipeline alignment. Specifically, Mayer's opinions could not have taken into account the significant monitoring and management activities that SNWA agreed to through the Applicant Committed Measures that are included therein. Likewise, Ms. Krueger's and Mr. Scoppettone's opinions that bird and fish life in Nevada are threatened by groundwater pumping are directly adverse to SNWA's applications and highly prejudicial to SNWA absent an ability to explore and challenge these opinions and their application to SNWA's current plans and the current conditions of the species.

On the other hand, the probative value of the Non-Testifying Federal Expert Reports is small. GBWN has other expert witnesses who can provide their own opinions on hydrology and

the birds and fish native to relevant valleys. Furthermore, the Non-Testifying Federal Expert Reports are several years old and do not respond to the present circumstances surrounding SNWA's proposed pumping. The dangers of prejudice substantially outweigh the probative value of the reports and they should therefore be excluded.

Furthermore, "[r]eports specifically prepared for purposes of litigation are not, by definition, 'of a type reasonably relied upon by experts in the particular field.'" *Tran Trong Cuong*, 18 F.3d at 1143. The Non-Testifying Federal Expert reports were prepared for litigation and are not the type of evidence reasonably relied on by hydrologists and biologists. Therefore, the admission of the Non-Testifying Federal Expert reports as reports relied on by an expert is inappropriate. GBWN should not be able to smuggle the Non-Testifying Federal Expert reports into the record without cross-examination through the backdoor of reliance by another expert.

In sum, the Non-Testifying Federal Expert reports are hearsay without any special guarantees of reliability. The opinions contained in the Non-Testifying Federal Expert reports were not made under oath and were made in anticipation of the adversarial hearings before the State Engineer. As noted, the Non-Testifying Federal Expert reports are essentially advocacy pieces. SNWA cannot receive a fair hearing without the opportunity to cross-examine Dr. Mayer, Ms. Krueger, and Mr. Scopettone in order to develop a full and true record. SNWA will not have this opportunity in the upcoming hearing.

There is no provision in the State Engineer's regulations that would allow SNWA to request that the State Engineer issue a subpoena to obtain the appearance of authors and subject them to cross-examination. *See Nev. Rev. Stat. § 533.454* (granting State Engineer with the power to issue subpoenas, but not providing a procedure for hearing participants to request issuance of a subpoena); LCB File No. R129-08 sec. 29 (eff. Feb. 11, 2009) (repealing Section

533.270 of the Nevada Administrative Code, which formerly authorized parties to request that the State Engineer issue a subpoena). Furthermore, it is questionable whether the State Engineer has the power to subpoena federal agents. See *In re Subpoena In Collins*, 524 F.3d 249, 251, (D.C. Cir. 2008) (“A state subpoena commanding a federal agency to produce its records or have its employees testify about information obtained in their official capacities violates federal sovereign immunity. . . . When a subpoena nominally directed at an agency employee seeks such information, courts nonetheless regard the subpoena as directed at the agency.”); *Houston Bus. Journal, Inc. v. Office of Comptroller of Currency*, 86 F.3d 1208, 1211 (D.C. Cir. 1996). Due process therefore requires that the State Engineer exclude the Non-Testifying Federal Expert reports.

**B. The Non-Testifying Federal Expert Reports are not subject to administrative notice.**

The State Engineer’s ability to take administrative notice must be narrowly construed because SNWA’s due process rights entitle it to a full and fair opportunity to confront evidence presented against it at an administrative hearing. Administrative notice should not be used to admit documents that present due process concerns and otherwise do not qualify under traditional exceptions to the hearsay rule. In this instance, the State Engineer should narrowly construe the applicability of administrative notice to the Non-Testifying Federal Expert Reports and rule that these documents are not properly subject to administrative notice. The relevant regulation states:

The state engineer may take administrative notice of or accept into evidence by reference to their contents:

1. Files and records of the office of the state engineer;
2. Public records that have been prepared by other governmental agencies;
3. Facts of which judicial notice may be taken by the courts of this state; and
4. Technical or scientific data that:
  - (a) Have been generally accepted by the relevant scientific community; and

(b) Are within the field of expertise of the Office of the State Engineer.

Nev. Admin. Code § 533.300, as amended by LCB File No. R129-08 sec. 26 (eff. Feb. 11, 2009).

The Non-Testifying Federal Expert Reports do not qualify as any of the types of documents that are allowed to be admitted through administrative notice. First, these documents are not files or records *of* the State Engineer's Office because they do not officially record the State Engineer's activities. DOI's simple act of submitting the documents to the State Engineer during a prior evidentiary exchange only placed the Non-Testifying Federal Expert Reports *in* the files or records of the State Engineer. Unlike the official documents that record the State Engineer's activities—such as rulings, orders, applications, permits, and certificates issued by the State Engineer that are properly admitted through administrative notice—documents contained in the hearing files of the State Engineer do not qualify for administrative notice simply because they are *in* the State Engineer's files. Otherwise, a party could submit any document to the State Engineer during an evidentiary exchange, and, even if the document is never admitted into evidence, it could be admitted through administrative notice. Further, even exhibits that were previously excluded from evidence in a prior hearing would then be admissible via administrative notice. Accordingly, the Non-Testifying Federal Expert Reports cannot be admitted through administrative notice as records *of* the State Engineer simply because they were delivered to the State Engineer by DOI during a prior administrative hearing.

Second, The Non-Testifying Federal Expert Reports do not qualify for administrative notice because they are not *public records* prepared by other governmental agencies. These documents are not public records because they go beyond mere recordation of facts and observations under an official duty. A "record" is a "written account of some act, court

proceeding, transaction, or instrument, drawn up, under authority of law, by a proper officer, and designed to remain as a memorial or permanent evidence of the matters to which it relates.” Black’s Law Dictionary 1273 (6th ed. 1990). The Non-Testifying Federal Expert Reports are not “records” because they offer expert opinions and serve as advocacy pieces prepared in anticipation of litigation before the State Engineer. They are not “public” as they have not been published to the public or been open to public inspection in the traditional sense.

Third, the Non-Testifying Federal Expert Reports do not qualify for administrative notice because they are not documents for which judicial notice could be taken by the courts of Nevada.

Nevada courts can take judicial notice of facts that are:

- (a) Generally known within the territorial jurisdiction of the trial court; or
- (b) Capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned, so that the fact is not subject to reasonable dispute.

Nev. Rev. Stat. § 47.130(2). These documents contain expert opinions that are clearly not facts generally known within Nevada. The asserted facts and opinions in these documents are also not capable of a ready determination of accuracy because they present one position on a disputed issue that is before the State Engineer.

Fourth, the Non-Testifying Federal Expert Reports cannot qualify for the administrative notice exception because they do not solely contain technical and scientific data. Instead, these documents contain opinions regarding disputed issues.

Finally, the decision to take administrative notice is discretionary. The State Engineer is not required to take administrative notice. Even if the Non-Testifying Federal Expert Reports were subject to administrative notice, the State Engineer should decline to take such notice for all the reasons mentioned above. The Non-Testifying Federal Expert Reports are hearsay and lack any special indicia of reliability.

C. **Admission of the Non-Testifying Federal Expert Reports without appearances by the authors to affirm the reports and undergo cross-examination violates the State Engineer's regulations.**

The State Engineer's regulations require exclusion of the Non-Testifying Federal Expert Reports because there is no testimony from expert witnesses to support the reports. Pursuant to the State Engineer's regulations,

1. The State Engineer may require in advance of the hearing:
  - (a) Identification of each exhibit that a party intends to use; and
  - (b) Exchange of exhibits between certain designated parties.
2. If a party fails to comply with a prehearing order to identify or exchange exhibits, the State Engineer may refuse to accept the exhibit into evidence.

Nev. Admin. Code § 533.280, *as amended by* LCB File No. R129-08 sec. 24 (eff. Feb. 11, 2009). The State Engineer may refuse to accept evidence submitted in violation of his order even if no prejudice is shown. *See* LCB File No. R129-08 sec. 24 (eff. Feb. 11, 2009).

In the initial evidentiary exchange, the State Engineer ordered that “[i]f a witness is not identified in the exchanges as testifying on direct as to a certain topic, the witness will not be allowed to testify to the un-identified topic in his or her direct testimony.” *In re Apps. 53987–53992 & 54003–54021*, Notice of Pre-Hearing Conf. & Hearing, at 4 (April 1, 2011). He also ordered that “[i]f a witness is to be presented to provide expert testimony, the evidentiary exchange shall include a written report prepared and signed by the witness, which shall contain *a complete statement of all opinions to be expressed and the basis and reasons for those opinions . . .*” *Id.* (emphasis added). The order suggests that an expert witness and the expert's report become part of the hearing record together. A party submitting an expert witness must submit an accompanying expert report and vice versa.

GBWN has submitted the Non-Testifying Federal Expert Reports without accompanying disclosures of the authoring expert witnesses. This violates the State Engineer's order regarding

the identification and exchange of exhibits, and under the regulations SNWA is not required to make a showing of prejudice in order to request that these documents be excluded. Though the Hearing Officer allowed the DOI exhibits into evidence over objections based on Nevada Administrative Code (“NAC”) Section 533.280 in the prior DDC hearing, NAC Section 533.280 has since been amended to no longer require a showing of prejudice in order to exclude evidence that fails to comply with the State Engineer’s evidentiary exchange orders. See LCB File No. R129-08 sec. 24 (eff. Feb. 11, 2009).

The intent of the State Engineer’s order is to have experts pre-disclose their expert opinions and the basis for those opinions in a signed report and limit the experts’ testimony to the contents of the reports. None of GBWN’s testifying experts have listed any of the Non-Testifying Federal Expert Reports as a basis for their opinions. Yet in order for these documents to be admitted, GBWN must intend to have its expert witnesses provide testimony regarding the Non-Testifying Federal Expert Reports, which is outside the scope of the GBWN witnesses’ signed expert reports. Allowing GBWN’s experts to testify regarding the Non-Testifying Federal Expert Reports violates the State Engineer’s order. Thus, the State Engineer should exclude the Non-Testifying Federal Expert Reports pursuant to Section 533.280(2) of the NAC.

Further, the State Engineer may require witnesses to submit written testimony before the hearing when many witnesses will appear or considerable technical testimony is necessary. Nev. Admin. Code § 533.250(1), *as amended by* LCB File No. R129-08 sec. 22 (eff. Feb. 11, 2009).

If written testimony is submitted, the witness shall also appear at the hearing to:

- (a) Affirm that his written testimony is true and correct and that he personally prepared it or directed its preparation; and
- (b) Submit to cross-examination.

*Id.* at § 533.250(2). The regulation requires that if a witness does not appear to affirm his written testimony and submit to cross-examination, then he shall not submit his written testimony. *Id.*

Even though the regulation refers to “written testimony,” it should be understood to also apply to written evidence in the form of expert reports. *See* Black’s Law Dictionary 1476 (6th ed. 1990) (“In common parlance, ‘testimony’ and ‘evidence’ are synonymous.”). Pursuant to the State Engineer’s regulations and order, the Non-Testifying Federal Expert Reports should be considered written testimony. In fact, Mayer 2007 is entitled “Expert Witness Testimony.” These reports must be excluded because the authors will not appear to affirm their written testimony and undergo cross-examination.

**III. CONCLUSION.**

For the foregoing reasons, SNWA asks that the State Engineer issue a pre-hearing order excluding the Non-Testifying Federal Expert Reports from evidence.

Respectfully submitted this 1 day of September, 2011.

Ross E. de Lipkau, Esq. and John Zimmerman, Esq.

The Court having reviewed the Record on Appeal ("ROA"), and having considered the argument of the parties, the applicable law and facts, and all pleadings and papers on file in this matter, hereby makes the following Findings of Facts, Conclusions of Law and Judgment.

**FINDINGS OF FACT**

During the period between January, 2004 and April, 2008, KVR filed a number of applications with the Nevada State Engineer seeking to appropriate new groundwater and/or to change the point of diversion, place of use and/or manner of use of existing water rights. The source of supply for the new ground water being sought is the Kobeh Valley Groundwater Basin located in Eureka County and Lander County, Nevada, and the Diamond Valley and Pine Valley Hydrographic Basins located in Eureka County, Nevada. The applications were filed in an effort to provide underground water to support a proposed molybdenum mine project to be located in Eureka County known as the Mount Hope Mine Project. The Applicant, KVR, is a subsidiary of General Moly, Inc. ("GMI"). GMI, acquired a leasehold interest in the Mount Hope Mine in 2005 and has since commenced the permitting process for the mine. Eureka County protested all applications to appropriate and all applications to change except Application to Appropriate 74587. The Diamond Valley Petitioners protested all of the applications except Application to Appropriate 74587.

On March 17, 2008, the State Engineer held a prehearing conference with all interested parties and on May 7, 2008 issued a Pre-Hearing Order. An Administrative Hearing on the applications was held before the State Engineer commencing on October 13, 2008 and continuing through October 18, 2008. The State Engineer issued Ruling No.

5966 (the "Ruling") on March 26, 2009, granting therein a majority of the applications subject to certain terms and conditions.

In his Ruling, the State Engineer found that KVR had provided sufficient proof of need to import water to the Mount Hope Mine Project from Kobeh Valley for a total combined duty of 11,300 afa. The State Engineer also found and allowed KVR to pump 354 afa from Diamond Valley to the Project, provided that any water pumped from Diamond Valley would be limited to existing rights. The State Engineer also found that KVR had not justified a need to import water from Pine Valley to the Project as proposed under Applications 76364 and 76365 and denied those applications. As a condition of the issuance of the permits allowed in the Ruling, the State Engineer ordered that prior to pumping any water allowed in the Ruling, KVR was required to prepare and submit to the State Engineer for approval, a hydrologic monitoring, management and mitigation plan. The State Engineer also found that KVR had provided substantial evidence on all other statutory requirements justifying granting the application.

In their respective Petitions and supporting briefs and materials, Eureka County and Diamond Valley Petitioners recite a number of assignments of error that they argue require this Court to vacate the Ruling and remand the matter back to the State Engineer for a new hearing. Chief among the assignments of error listed by Eureka County is that Eureka County's due process rights were violated by the State Engineer's admission and consideration of evidence not previously provided to Eureka County.<sup>1</sup> Eureka County and Diamond Valley Petitioners also argue that in a number of areas, the Ruling is not

---

<sup>1</sup>See Eureka County's Opening Brief.

1 supported by substantial evidence and is therefore arbitrary and capricious.<sup>2</sup> Respondent  
2 State Engineer and Respondent in Intervention KVR counter that the State Engineer did not  
3 violate Petitioners due process rights by improperly considering evidence not previously  
4 disclosed to Petitioners, and further, that the findings of the State Engineer are supported  
5 by substantial evidence. The Court will review the issues presented accordingly.  
6

7 **ISSUES PRESENTED**

8 **A. Whether Petitioners' Due Process Rights Were Violated By The State**  
9 **Engineer's Admission and Consideration Of Evidence Not Previously**  
10 **Disclosed To Petitioners.**

11 Pursuant to Nevada law,<sup>3</sup> the State Engineer issued a pre-hearing order on  
12 May 7, 2008 directing the parties to complete an initial exchange of witness lists and  
13 exhibits no later than June 16, 2008. The order further directed the parties to exchange like  
14 information the parties intended to use in their rebuttal cases. The second information  
15 exchange deadline was August 15, 2008. The ROA indicates that the parties complied with  
16 the discovery order and exchanged information in preparation of the evidentiary hearing.  
17 As part of the information exchange, KVR provided Petitioners a copy of the Regional  
18 Groundwater Model that KVR intended to introduce at the hearing in support of its  
19 applications.

20 During the October, 2008 administrative (evidentiary) hearing before the State  
21 Engineer, Petitioners and the State Engineer learned from KVR for the first time that on  
22 October 3, 2008, KVR had submitted to the Bureau of Land Management ("BLM") as part  
23 of the National Environmental Policy Act ("NEPA") process, a new or updated version of its  
24

25 <sup>2</sup>Id.

26 <sup>3</sup>See NRS 533.365; NAC 533.280.

1 Regional Groundwater Model. As part of its evidentiary presentation, KVR sought to  
2 introduce its original Regional Groundwater Model, Exhibit 116, and have its experts testify  
3 as well to the differences between Exhibit 116 and the new or updated version of the Model  
4 submitted to the BLM. As KVR had not produced copies of the BLM version of the Model  
5 to Petitioners prior to or during the hearing, Petitioners expressed their concern that they  
6 would be unable to adequately cross-examine KVR's witnesses on the BLM version or have  
7 time to have Petitioners' experts review the new version to determine reliability.  
8 Notwithstanding Petitioners' concern about not having had access to and time to review the  
9 BLM version prior to the hearing, the parties appeared to have reached an agreement on  
10 how the matter would be handled in the remainder of the hearing.<sup>4</sup>

11  
12  
13 <sup>4</sup>See Hr'g Tr., Vol. II, pp. 213-218 where the following exchange occurred:

14 HEARING OFFICER WILSON: Let's be on the record. We left off with the last witness, Steve  
Walker, with Eureka County. I was told we might have some preliminary matters to take care  
of before we continue on?

15 MS. PETERSON: Mr. De Lipkau, did you want me to address that or did you want to - -

16 MR. De LIPKAU: I'd like you to go first and then we'll respond.

MS. PETERSON: To our agreement that we came to last night? That's what I'm going to  
address.

17 MR. De LIPKAU: Right. Please do.

18 MS. PETERSON: Thank you. The parties, well, mainly Eureka county and the applicant had  
some discussions last night after the hearing and there is a model that the applicant had  
submitted to the BLM on October 3<sup>rd</sup>.

19 The protestants have not had an opportunity to review that model. I believe the applicant  
would like to have that information, that model submitted to the State Engineer's Office for  
consideration in this proceeding.

20 So, We talked about a procedure that would allow the hearing to go forward because  
21 everybody is here and we can give you all the information that we have, but also that the  
technical experts would be able to get together after the hearing when that model is publicly  
available and they could discuss it and try to come to some consensus on the model.

22 I believe it's our understanding that that discussion could include also the State Engineer's  
23 technical expert and I think possibly the BLM's technical expert.

24 Then if they can come to some consensus, that would be presented to the State Engineer and  
if there was not complete consensus, then all the parties would be given an opportunity to  
present written information to the State Engineer to consider as to what changes they think  
need to be made to the model and why.

25 Then the State Engineer obviously would be able to convene any other meeting or anything  
else he might need to make his decision. But the ultimate goal would be to try to have a  
26 decision out as originally planned like mid February.

I don't know, is that clear or do you need further information?

SEVENTH JUDICIAL DISTRICT COURT

DAN L. PAPEZ  
DISTRICT JUDGE

26

MR. FELLING: Well, when were you going to present this model; today?

MS. PETERSON: No. The October 3<sup>rd</sup> model?

MR. FELLING: Yes.

MS. PETERSON: It's not publically available. The BLM has it, it's part of the EIS Process.

MR. FELLING: Okay. So when would it be available to, for instance, our office?

MR. DeLIPKAU: I can't answer that question. It depends on when the BLM would release it. It could be as short as two weeks, it could be a matter of months.

What I'm saying if I can have a moment is that we want the hearing to proceed on the evidence submitted to the State Engineer.

The new model, as it's been called, has additional information as required by the BLM under its EIS authority. It does not involve this office.

The conclusion of the model, as submitted to the BLM, is virtually identical to the model before the State Engineer. As Ms. Peterson stated, when this report does in fact come out, again it's virtually identical in effect, we'll be happy to sit down via our computer people and go through it.

We will invite the State Engineer to be there also, as well as perhaps the BLM. What we're checking is that the State Engineer proceed with the hearing based upon the evidence previously submitted by the parties.

MR. FELLING: When you present testimony on the model, will your witness be able to answer questions pertaining to what is the difference between the models?

MR. DeLIPKAU: Yes.

MR. FELLING: Okay.

MR. DeLIPKAU: And again, the answer is virtually indistinguishable.

MR. FELLING: I'd rather hear it from the person presenting the model. If they were the same, they wouldn't both be necessary.

MR. DeLIPKAU: Well, that's our point.

MS. PETERSON: I just think that we need to be very careful about that because we obviously haven't had a chance to review that and concur with that information. We haven't seen it. It's my understanding that some of the changes that we proposed in our testimony have been made to that version of the model.

MR. DeLIPKAU: One more comment. We certainly don't want the ruling, this ruling held up by any delay in the BLM in releasing the amended computer report.

HEARING OFFICER WILSON: Mr. Benesch, go ahead.

MR. BENESCH: I guess I'm not understanding. They don't want anything held up, they can't tell you when you're going to get it, they can't tell you how long it's going to take to review it, they can sort of tell you there's some changes in it, but they're turning this into a moving target.

Let's just all go home and come back when they've done their work and reconvene and continue on with the hearing. That seems to make as much sense as anything.

MR. FELLING: Can we talk a few moments?

MR. BENESCH: This is highly unusual, to say the least.

HEARING OFFICER WILSON: Mr. Miller, anything to add?

MR. MILLER: No.

HEARING OFFICER WILSON: Thank you. We're going to talk about this for a few minutes. We'll be off the record and you're welcome to take a break for probably at least ten minutes.

(A short recess was taken.)

HEARING OFFICER WILSON: Let's be back on the record.

MR. KING: We're going to go ahead and go through with the hearing as planned.

Having this new model does present a little bit of a dilemma, but again, we'll go through with the hearing, maybe through questioning, cross-examination and then we can get a better feel for what the differences might be between the two models.

By the end of the hearing we'll decide whether or not we're going to need to keep the hearing open for some amount of time. We'll make that decision through the course of this hearing.

Consistent with the agreement between counsel that testimony regarding the differences between the original Regional Groundwater Model and the October 3, 2008 BLM version would be allowed during the hearing, KVR's witness Dwight Smith offered testimony regarding the differences between the original Model, Exhibit 116, and the BLM version.<sup>5</sup> At the conclusion of Dwight Smith's testimony, counsel for Eureka County again reiterated her position as to the testimony regarding Exhibit 116 and the BLM version of the Model.<sup>6</sup> After a great deal of further discussion on this issue by counsel for Petitioners, counsel for KVR, and the Hearing Officer, the Hearing Officer overruled Petitioners' motion to strike the testimony regarding the BLM version of the Model, stating that the testimony and slides regarding the BLM version would remain a part of the record but would not be considered by the State Engineer in the final ruling on the applications.<sup>7</sup> The Hearing Officer clearly stated that only Exhibit 116 would be considered.<sup>8</sup>

Notwithstanding the State Engineer's decision that the testimony and slides concerning the BLM version of the Model would remain a part of the record but not be considered in the determination of KVR's applications, the BLM version of the Model was noted several times in the Ruling. In the Ruling, the State Engineer stated: "[t]he method

---

<sup>5</sup> Hr'g Tr. Vol. V, pp. 931-962.

<sup>6</sup> Hr'g Tr., Vol. V, p. 953.

<sup>7</sup> Id. at p. 962.

<sup>8</sup> Id.

1 the Applicant used to simulate the net effect of mine pumpage was modified for the BLM  
2 and not presented at the hearing as discussed above, but the results of the revised  
3 simulation would not significantly change the estimated drawdown due to mine pumping.”<sup>9</sup>

4 The State Engineer again referenced the BLM version of the Model in the Ruling stating:

5 a better method of simulating the net effect of the mine-related  
6 pumping on the hydrologic system would have been to simulate  
7 the region with and without the mine pumping, and then to  
8 compare the results to compute the actual effect of the mine  
9 pumping. This was completed for the BLM in the EIS process,  
10 but was not completed in time for the hearing. The results  
11 relating to inflow to Diamond Valley from Kobeh Valley from this  
12 BLM simulation were addressed in the testimony of Smith. He  
13 testifies that these will be a net reduction in subsurface flow  
14 from Kobeh Bally to Diamond Valley at 62 to 130 afa after 44  
15 years of mine pumping.

16 See ROA Vol. V, p.33.

17 Eureka County argues that the State Engineer also referenced the BLM  
18 version of the Model in the “Impacts to Existing Rights – Eureka County” section of the  
19 Ruling found at ROA Vol. V, pp. 34-35 by referencing model adjustments and meaning  
20 without specifically saying adjustments made in the BLM version of the Model. The Court  
21 believes Eureka County’s contention is correct.

22 In reviewing the law applicable to these facts, the Court notes that the Nevada  
23 Supreme Court has specifically stated that the State Engineer must comply with the basic  
24 notions of fair play and due process in issuing any Ruling.<sup>10</sup> Indeed, the Nevada Supreme  
25 Court stated in *Revert*:

26 The applicable standard of review of the decisions of the State

<sup>9</sup>ROA, Vol. V, p.34.

<sup>10</sup>*Revert vs. Ray*, 95 Nev. 782, 787, 603 P.2d 262, 264 (1979).

Engineer, limited to an inquiry as to substantial evidence, presupposes the fullness and fairness of the administrative proceedings: all interested parties must have had a "full opportunity to be heard," see NRS 533.450(2); the State Engineer must clearly resolve all the crucial issues presented, see *Nolan v. State Dep't of Commerce*, 86 Nev. 428, 470 P.2d 124 (1970)(on rehearing); the decision maker must prepare findings in sufficient detail to permit judicial review, *id.*; *Wright v. State Insurance Commissioner*, 449 P.2d 419 (Or. 1969); see also NRS 233B.125. When these procedures grounded in basic notions of fairness and due process, are not followed, and the resulting administrative decision is arbitrary, oppressive, or accompanied by a manifest abuse of discretion, this court will not hesitate to intervene. *State es rel. Johns v. Gragson*, 89 Nev. 478, 515 P.2d 65 (1973).

95 Nev. 782, 787 (1979).

The Nevada Supreme Court has recognized that due process and fair play include meaningful cross-examination.<sup>11</sup> Fairness and due process in administrative hearings also accepts the notion that "the procedural rights of parties before an administrative body cannot be made to suffer for reasons of convenience or expediency."<sup>12</sup>

The United States Supreme Court has held that "the Due Process Clause forbids an agency to use evidence in a way that forecloses an opportunity to offer a contrary presentation."<sup>13</sup> "The action of ... an administrative board exercising adjudicatory functions when based upon information of which the parties were not apprised and which they had no opportunity to controvert amounts to a denial of a hearing."<sup>14</sup> As has been recognized by other states, a full and fair opportunity to be heard, which is essential to due process,

<sup>11</sup>*Bivens Const. Vs. State Contractors Bd.*, 107 Nev. 281, 283, 809 P.2d 1268, 1270 (1991). (The Court recognizes that the State Engineer is exempt from the Nevada Administrative Procedures Act).

<sup>12</sup>*Checker Inc. Vs. Public Service Commission*, 84 Nev. 623, 634, 446 P.2d 981, 988 (1968).

<sup>13</sup>*Bowman Transp. Inc.v. Arkansas-Best Freight System, Inc.*, 419 U.S. 281, 288, fn.4 (1974).

<sup>14</sup>*English v. City of Long Beach*, 217 P.2d 22, 24 (Cal. 1950).

JUDICIAL DISTRICT CLERK  
DAN L. PAPEZ  
DISTRICT JUDGE  
DEPARTMENT 2  
WHITE PINE, LINCOLN AND EUREKA COUNTIES  
STATE OF NEVADA

1 requires that all evidence utilized to support a decision be disclosed to the parties so that  
2 they may have an opportunity to cross-examine the witnesses with regard to such  
3 evidence.<sup>15</sup> "A decision based on evidence not in the record is a procedure not to be  
4 condoned."<sup>16</sup>

5 Respondent KVR argues that no due process violation occurred in this matter  
6 for several reasons: (1) that because Eureka County is a participating party in the NEPA  
7 process, it should have had knowledge of and information regarding the update to the  
8 Regional Groundwater Model at the time of the evidentiary hearing; (2) that if any due  
9 process error has occurred in this matter, Eureka County invited such error because it  
10 requested the testimony and slide presentation of the BLM version of the Model to be given  
11 at the hearing; (3) that no due process violation has occurred because Eureka County, as  
12 a participant in the NEPA process, has post-hearing access to all updates of the Model  
13 submitted to the BLM; and (4) that even if all testimony and evidence regarding the  
14 Regional Groundwater Model and its updated version were withdrawn from the evidence,  
15 substantial evidence remains in the record to support the State Engineer's findings.  
16

17  
18 Regarding KVR's allegation that no due process violation has occurred  
19 because Eureka County was a participant in the NEPA process and therefore had access  
20 to the October, 2008 Model update, the Court finds that such situation, if accurately stated,  
21 did not relieve KVR of its duty to disclose such evidence to Eureka County and Diamond  
22 Valley Petitioners prior to the hearing. Although the deadline for exchanging discovery  
23

24  
25 <sup>15</sup>*Cook County Federal Sav. & Loan A'ssn v. Griffin*, 391 N.E.2d 473, 477 Ill. App. 1979); *In re Amalgamated*  
26 *Food Handlers, Local 653-A*, 70 N.W.2d 267, 272 (Minn. 1955); *English*, 217 P.2d at 24 (Cal. 1950).

<sup>16</sup>*Cook County Federal Sav. & Loan A'ssn*, 391 N.E.2d at 477 (Ill. App. 1979).

1 information had passed, the Court believes that both sides had a continuing obligation to  
2 disclose discovery information. Simple fairness would dictate such a procedure. Even if  
3 Eureka County could have availed itself of the updated Model information prior to the  
4 hearing, it was not on notice that such evidence would be presented at the hearing. The  
5 Court therefore rejects KVR's argument to the contrary.

6  
7 The second point KVR raises is that Eureka County cannot now complain of  
8 a due process error when it invited error itself by requesting that KVR be required to explain  
9 the differences during the hearing between the original Region Groundwater Model (Exhibit  
10 116) and the October, 2008 updated BLM version of the Model.<sup>17</sup> KVR suggests that the  
11 State Engineer was complicit in the admission of such evidence and that KVR did all that  
12 it could to ensure that the BLM version of the Model would not be considered as evidence.  
13 KVR argues that at no time did it attempt to rely on the BLM version as evidence supporting  
14 its case.<sup>18</sup> KVR contends the only purpose of having its witness discuss the BLM version  
15 was to describe the differences between the original and updated version of the Model so  
16 that the State Engineer could determine whether to continue the hearing to allow Petitioners  
17 additional time to review the updated Model.<sup>19</sup>

18  
19 In Nevada, the doctrine of invited error applies to both civil and criminal cases  
20 and basically states the principle that a party will not be allowed to complain on appeal of  
21 errors which that party itself induced or provoked the hearing officer or opposing party to  
22  
23

26 <sup>18</sup>*Id.* at p. 19.

<sup>19</sup>*Id.*

1 commit.<sup>20</sup> The ROA in this case reflects that early on during the evidentiary hearing,  
2 Petitioners learned from KVR that it had submitted an updated version of its Regional  
3 Groundwater Model to the BLM as part of the NEPA process in early October, 2008.  
4 Although not entirely clear, the ROA indicates that Petitioners and KVR had discussions off  
5 the record on how such evidence would be treated if presented by KVR given the fact that  
6 the updated version had not been disclosed to Petitioners and Petitioners were unprepared  
7 to meet such evidence. As previously discussed, the parties appeared to have reached an  
8 agreement on how such evidence would conditionally be presented to the hearing officer.<sup>21</sup>  
9 After KVR's witness testified to the differences between the two versions of the Model and  
10 presented his power point program, Eureka County moved to strike the evidence regarding  
11 the BLM version of the Model. Upon inquiry by the hearing officer, KVR requested the  
12 hearing officer only to consider Exhibit 116 in support of its applications and not information  
13 presented on the BLM version of the Model. The hearing officer stated that the disputed  
14 evidence would remain on the record but would not be considered in the final decision on  
15 the applications. Unfortunately and contrary to the hearing officer's assertion, reference to  
16 the disputed BLM version of the Model appeared at least three times in the Ruling.

17  
18 From these facts the Court cannot find that Petitioners invited error by insisting  
19 or requesting the BLM version of the Model be presented in the hearing. In fact, the record  
20 indicates that Petitioners were placed in a tough spot when they learned of the BLM version  
21 early on in the hearing and in an effort to accommodate completing the hearing as  
22

scheduled, reached an agreement with KVR on how the evidence would conditionally be presented by KVR. By so doing, Petitioners committed no wrong. Accordingly, the Court finds that Petitioners did not invite error in the proceedings.

KVR next argues that Eureka County's claim that it had not reviewed the BLM version of the Model prior to the hearing is baseless because as a participant in the NEPA process, Eureka County continues to have access to the contents and conclusions contained in the BLM version. While KVR's assertion may be true, the fact remains that Eureka County and Diamond Valley Petitioners had not been placed on notice prior to the hearing through discovery exchanges or otherwise that evidence concerning the BLM version would be offered at the hearing by KVR. Because Petitioners were not prepared to meet such evidence, they were denied a full and fair opportunity to examine and/or challenge such evidence. The ability of Petitioners to access such information post-hearing does nothing to cure the deficiency.

Finally, KVR argues that evidence offered at the hearing regarding the groundwater models was merely a part of the evidence it offered to show the possible hydrologic effect of groundwater pumping on nearby surface or groundwater sources. KVR contends that if all evidence concerning the groundwater models including Exhibit 116 and any evidence regarding the BLM version were withdrawn from the evidence, other independent evidence standing alone would support the State Engineer's finding that the development of 11,300 afa of groundwater in Kobeh Valley would not adversely affect existing rights in Diamond Valley.<sup>22</sup>

<sup>22</sup>Without specifically stating or conceding a due process violation, KVR appears to be requesting the Court to conduct a harmless error analysis in this matter. The Court is unaware of any authority, and KVR has cited no authority that allows a court in Nevada to conduct a harmless error analysis of a due process violation in

STATE OF NEVADA  
DISTRICT JUDGE  
DAN L. PAREZ  
DEPARTMENT 2  
WHITE PINE, LINCOLN AND EUREKA COUNTIES  
STATE OF NEVADA

1 Assuming arguendo, that KVR's contention is true, the problem remains that  
2 the State Engineer cited the evidence concerning the BLM version of the Model in the  
3 Ruling. The Court is unaware how those references can now be undone.

4 The Court has considered as well whether the references to the BLM version  
5 of the Model in the Ruling were merely passing references without reliance thereon, or  
6 whether the references provided some of the basis for the findings stated in the Ruling.  
7 After a careful and deliberative review of the Ruling, the Court believes that the State  
8 Engineer considered such evidence to support the findings in the Ruling. As such,  
9 Petitioners' due process rights were violated as they were denied a meaningful opportunity  
10 to challenge such evidence.

#### 11 CONCLUSIONS OF LAW

12 Based upon the findings hereinabove set forth, the Court hereby concludes:

13 1. The right to cross-examine witnesses in an adjudicatory proceeding is  
14 one of fundamental importance and its denial in this case amounted to a violation of due  
15 process.  
16

17 2. That Petitioners' due process rights were violated because evidence of  
18 the BLM version of the Model was not disclosed to Petitioners prior to the hearing nor were  
19 Petitioners put on notice that such evidence would be offered at the hearing, thus denying  
20 Petitioners a full and fair opportunity to meet or challenge such evidence.  
21

22 3. That Petitioners' due process rights to a full and fair hearing were  
23 violated when the State Engineer considered and relied upon evidence (the BLM version  
24 of the Model) in the Ruling when the State Engineer stated such evidence would not be so  
25
