State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

is this all these utility companies can find to do. new ways to screw the residents. this seems to be on going and perpetual . they must sit on their asses looking for new ways to get us.stop this program and save the basin. we have no need for 15 billion in charges. leave it alone and go away. thanks

Sincerely,

allen musicant
