Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Las Vegas should follow cities like Phoenix and learn to manage its available resources and not rely on others to bail them out. Lake Mead is at its lowest level since Hoover Dam was built. Read the message...conserve or do without!

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. Andrew Woodard
