State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

I strongly believe that Las Vegas has other options, i.e., water conservation efforts, which will be much less expensive and as effective as this proposed pipeline. Let's explore those options, instead of expending the funding for this project.

Sincerely,

Ann Bley
