Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. I have only lived in Nevada for five years and have come to really love the entire state. There is so much life and beauty in the desert that only those that have truly witnessed it can believe. To the unseeing, it is only desert that does not matter. To those that love it, it is a thing of great beauty and full of life.

Please do not sanction the raping of this wonderful and fragile country. Las Vegas and other cities, including Reno, should live within the water supply that they have and not keep building at the expense of others.

Thank you for your time,

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Bambi Murphy
