Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin.

We cannot waste one drop of water anymore so please stand up to developers who will build anywhere anytime. We already have way too many empty houses so let's be smart and remodel instead of stealing water from our rural and native communities. This plan is not smart and not cheap -- and who has extra money to put out right now? Thank you for reading my viewpoint.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. barbara jean
