State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

I strongly oppose the plan to take groundwater from the Great Basin. The poor planning and overbuilding of Las Vegas by people who do not have the best interest of the state is a subject that has angered me for all of my adult life. I have lived in Las Vegas for 68 years; my husband has lived here his entire life--80 years. Please act responsibly! Barbara Rowan

Sincerely,

Barbara Rowan
