State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Dear State Engineer King

I am highly opposed to draining underground water from the Great Basin. This action would seriously impact a pristine area of our state but most specifically Native American communities, wildlife habitat, and rural economies.

I request that the Southern Nevada Water Authority be denied in its demand for groundwater rights in White Pine and Lincoln counties. For once, I hope that a state agency will believe the scientific information rather than give in to the demands of vested financial interests.

Sincerely,

Betty Dodson
