Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. Its beauty is something I hold dear. This is the first place I went backpacking & camping. If it wasn't for this place & Baker Lake's peaceful tranquility I would have never fallen in love with those activities. I visit the Great Basin area regularly, & would hate to see it drained.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Bradley Bohannon
