Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Please don't let greed and money steer you on this very important decision. As a native american, our people lived in the great basin for thousands and thousands of years. We only take what we need, nothing more. This is the worst idea ever to take water from a very fragile environment and pump it elsewhere. It will leave the Basin in ruins and then it will become like everything else the dominant race touched. It is our wish that money isn't the only thing to consider. We have only one Earth, and so much of it is being lost everyday so please leave the water alone. Thank you for your understanding and consideration in this vital matter.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. Brent Hunter
