Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. Not only that, Las Vegas is not the only place in the world. Turn off the casino waste and abuse of water and don't give that old "it's recycled water crap". All water is recycled. What the casinos do is throw it in the air for evaporation and the water is transferred to another hydro eco system. Gaming and gambling is not a business it's an addiction to money that abuses the weak. Shut it down and we will have plenty of water in Las Vegas. The people have given enough, now it's time for the fat cats to contribute. It's time to foreclose on the casino's.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. Bruce Dutton
