Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

As a teacher, I tend to look for long range outcomes to any action. Draining the Great Basin would have a very long term negative effect on the land and all it's inhabitants. We live in the high desert and have trouble with having enough water for Northern Nevada residents. Why compound the problem by draining what little water we do have?

Mindless corporate greed for short-term gain is totally inappropriate for the "greatest good of the people of Northern Nevada."

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. Caren Linfield
