Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. This region has a wealth of natural beauty and it's citizens deserve to have their natural resources protected from the greed of the Water Authority here in So. Nevada.

We need to learn to live within the resources that we have. If that means higher rates or further restrictions, then let that happen. We have learned all to well, what happens when you live beyond your means. There are millions of displaced homeowners to prove that fact.

Just because there is groundwater in our state, does not give us the right to steal it.

Please make the right decision for the people of the Great Basin.

Thank You.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.
