State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

We live in a desert landscape and I am continually stunned and dismayed over the mindless and senseless overuse of water, a most precious resource in Nevada. Planting grass should be limited to parks, playgrounds and school athletic fields. Nevadans need to be educated on the sensible use and conservation of water.

Sincerely,

Carolyn Miller
