Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. The Great Basin National Park would be affected negatively. Many families from all parts of Nevada and the country visit the area. We have gone there many times and love the area.

If that part of Nevada is turned into a waterless desert, noone would benefit, not even the Southern Nevada developers. Think of future generations - not the quick fix for the few.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mrs. Catharine Sanders
