Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

This is a wonderful part of our country that definitely needs protection at this time. I travel through the Great Basin almost every year now and have really grown to appreciate its unique beauty. This water project is a VERY BAD idea for multiple reasons not the least of which is its cost at a time when the economy of this part of the country is way down. Stop this project now and please don't allow it in the future either. Thank you for your attention to this important issue. Sincerely, Curt Sanders Zephyr Cove, NV.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. Curt Sanders
