Subject: A 300-Mile Pipeline is Not the Answer.

Dear Jason King,

Great Basin National Park is an extraordinary place--remote, scenic, and treasured by millions of Americans who value our national park system. Plans to pump millions and millions of gallons from the park's vast ecosystem greatly threaten what is special about this place.

I appeal to you, Mr. King, to dismiss questionable, ecologically-unsound plans to pump and move water from one location in Nevada more than 300 miles to Las Vegas. I appeal to you to respect Nevada's sole national park and make certain the park's resources are sustained for generations to come.

The AMOUNT of money this is going to cost is absurd! If Nevada spends money on ANYTHING, it needs to be education. Period. Lake Mead is where we get our water, and although it is significantly drying up, a NATIONAL PARK is not the answer for our water needs.

Find a different place to get water, or don't do it at all. Please.

Thank you for your thoughtful consideration.

Sincerely,
Ms. Dagny Signorelli
