Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

As retiree and a resident of Las Vegas, I personally cannot afford for water that we currently have to be piped out of the area and driving the cost of water up further. Additionally, with the housing market in the area as it is, we certainly do not need any more housing developments driving the cost of housing even lower. Don't make a decision that will endanger the economic and environmental impact in the Great Basin!

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. Darlene Howell
