Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experiences that I have of the area travelling and camping in the Great Basin since I was a kid growing up in the Pacific Northwest and visiting the area on trips to California and southern Utah.

But, more importantly, we have no right to trash this fragile terrain through greedy exploitation in.. or out... of the basin. It would create another overtapped oasis for another round of ill-advised and profligate growth in southern Nevada...thus inviting disaster for both regions! I know money talks...but sometimes wise parties just shouldn't listen! Just say no to this really bad idea....Please save us all a whole lot of grief! Regards, Dave Hamilton...Las Vegas

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. David Hamilton
