State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Dear State Engineer Jason King

I believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area. I also don't agree with the price tag of the project. The families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford it. Continue the efforts of conservation and reduction of water use.

Sincerely,

David Sonnichsen
