Dear State Engineer Jason King State Engineer King,

DEC 01 2011

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

LAS VEGAS OFFICE

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It is imperative that you listen to common sense concerning this water issue. The citizens of Nevada cannot and should not pay the higher costs for water because of unneeded and unwanted pipeline.

Sincerely

Davy Peoples
