State Engineer Jason King  
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Water is a valuable and scarce resources. Nevada does not need to become another California, living way beyond the water resources. California has the option of using their large ocean coast line to desalinate water, Nevada does not have that option. Northern Nevada needs to keep control of its water resources.

Sincerely,

Douglas Ramseth
