State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

The majority of the houses in Las Vegas is under water homeowners already owe more than there homes are worth. Families are already struggling and can't afford additional cost added on to there water bill.

Sincerely,

Elaine Dennis
