State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

I see this as one more major act of greed, destruction, and spending!!! I have to wonder who would really benefit from this project? Certainly not the residents of Southern Nevada. Our numbers are down, our housing market is trashed, our unemployment rate is up. Of course those who think we should just keep building and expanding the valley are obviously the ones who will benefit. I urge you to put a stop to this potential project right now.

Sincerely,

Eleanor Clinton Issa
