Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

I, as a private citizen am opposed to the grab for water that is taking place in the southeastern Nevada area. This is a bad idea that will cause irreparable harm to the ecosystems across the Great Basin. Just look at southern California for examples of how not to appropriate water.

Nevada is a desert - and needs to be treated as one. Building more homes in the desert of southern Nevada is NOT the answer. Please stop the insanity.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. Ellyn Bryans-Darrah
