Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

I live in western Nevada but I am a regular backpacker in central Nevada, which is one of the most diverse ecosystems anywhere. That this proposal is being considered is appalling.

I'd like for the Great Basin, the most arid region of the country, to be intact when our grandchildren and great grandchildren will need to depend upon, and enjoy, it. I'm counting on you to do the right thing.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Elyssa Rosen
