State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

We need to live in sustainable environments... including financial. Do not allow another cent to be spent on this project.... it will never happen anyway.... but millions will be spent on studies that will tell us what we already know. It is a terrible idea.

Eric Ray

Sincerely,

Eric Ray
