Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. This is another case of Reverse "Robin Hood." The developers in Nevada have gotten away with murder. The Planning Commission is a farce. As an example, the bridge to "no where." The bridge on 215 and Lake Mead was put in for the development of the area on the West side of 215. It other words 13 million dollars was spent to appease the developers. The people in Sun City did not want that bridge because it opened up their area to through traffic. It's time for the people to take back their state and not let the "Big Money People" dictate their plans on getting rich. The Developers have most of the news services on their side because of the large amount of money spent for advertising. The local "fish wrapper", the Review Journal, bends over back words to accommodate the developers. Big money is spent on a weekly section for real Estate ads. So wake up dumb and dumber Nevadans. This pipe line is a pipe dream to help the Developers get rich at any expense to the land or the enviornment. However, don't look for any of the news media to divulge this!

We urge you to deny the applications filed by the Southern Nevada Water
