State Engineer Jason King, State Engineer  
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

We think that taking the water is robbery.

I think that if we can use the water that is available in Santa Barbra, CA from the sea, all we have to do is desalinize the water, and it is whole lot closer than parts of Nevada.

Sincerely,

Frank Tepper  
2420 Marlene Way
