Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. I have visited the Great Basin National Park on many occasions. It is just terrible that anyone would want to drain groundwater from rural Nevada and damage its communities and people. Please leave the The rural population, the National Park and the wildlife habitat alone. Thank you for your attention, Fred A. Laubscher, M.D.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Dr. Frederick Laubscher
