State Engineer Jason King  
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

The Creator figured out the water plan without our intervention. the disrespect shown to those who occupy the land means nothing to those who take from them. The eco-system has adhered to the amount of available water and stands to be devastated by those who are only interested in financial gain regardless of consequences. the Native American reservations are a sovereign land the water grabbers have no right to in any demeanor. Learn to utilize what you have appropriately instead of taking what doesn't belong to you. Quit taking 20 minute showers and watering our streets!

Sincerely,

Gecko Benjamin
