Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Having lived in Utah and Nevada my whole life, I am committed to the long-term interests of this region, and of future generations who will continue to call this place home. I love and value Great Basin National Park and other places that would surely be adversely affected by such a short-sighted project, and I am familiar with communities in Snake Valley and neighboring areas who are working to defend their right to what little water they have.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. George Brooks
