

Nov. 29, 2011

State Engineer:

I represent family and friends who oppose the pipeline and water project to take water from rural Nevada and transport it to Las Vegas, our concern is for the environment in general and water at our small ranch in Lincoln county at Acoma,

It is absolutely wrong to send water to Southern Nevada to water golf courses and line rich people's pockets with green while reducing green in rural Nevada.

Please deny this attempt to water grab.

Harold E. Wittwer
