Subject: A 300-Mile Pipeline is Not the Answer.

Dear Jason King,

I visited Great Basin National Park last month and found it is an extraordinary place--remote, scenic, and treasured by millions of Americans who value our national park system. The Lehman Caves were awe inspiring and Mount Whitney especially so!

Plans to pump millions and millions of gallons from the park's vast ecosystem greatly threaten what is special about this place.

I appeal to you, Mr. King, to dismiss questionable, ecologically-unsound plans to pump and move water from one location in Nevada more than 300 miles to Las Vegas. I appeal to you to respect Nevada's sole national park and make certain the park's resources are sustained for generations to come.

Thank you for your thoughtful consideration.

Sincerely,
Ms. Holly Van Valkenburgh

Subject: A 300-Mile Pipeline is Not the Answer.

Dear Jason King,

I mis-typed, and when I attempted to correct my error the message was sent ... it is Mount Wheeler in the Great Basin National Park, not the other one that starts with a "W". Please forgive my error.
Holly

Sincerely,
Ms. Holly Van Valkenburgh
