Organization: IUPAT District Council 15

I am in favor of the pipeline project that has been proposed By SNWA.

I have been a resident of Southern Nevada for 18 years. I have seen a tremendous amount of effort and emphasis placed on conservation of consumption and they have been largely successful. Unfortunately, I believe that conservation has not been enough, given the explosion in population that we have seen in Clark County over the last decade.

Building the pipeline does multiple things: It creates good paying construction jobs, it guarantees that the economic generator of the state has sufficient natural resources to survive prolonged periods of drought similar to what we have experienced over the last several years. This should not replace conservation efforts, but should supplement it.
