Mr. King

Southern Nevada Water Authority's proposal will risk the livelihood of both those in Eastern Nevada (and Western Utah) by draining their resources and those in Southern Nevada who will be forced to pay for expensive project.

Native flora and fauna that rely on these water resources will die off as water tables in the region drop. Since water equates with life, rich and diverse ecosystems will be replaced with barren, sparsely populated regions vulnerable to dust storms, and erosion.

Please deny SNWA's request for water rights in the Great Basin.

Nevadans cannot afford this project.
