Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. It is an amazing forest that supports enumerable plants, trees and wildlife. Hiking thru this area gives you a sense of a quiet jewel nestled protectively within the boundaries the winding hills. Deer will walk right past you and the ancient Redwoods still stand tall, reminding us of what we have lost in so many places. Vegas needs to find another water source!

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Jennifer Shippee
