State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Mr. King,

This new pipeline proposal is not the right idea to furnish water to Southern Nevada. The cost of such a proposal is prohibitive to consumers which eventually will have to pay for this. The excess rainfall we're experiencing in the Rockies and nothern mountains will sustain our water needs for present without putting an extra burden on consumers already strapped with high unemployment and stagnant wages.

Sincerely,

Joe Jackson
