State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Mr. King, this pipeline proposal is unneeded, inappropriate, and absurdly expensive. If the Las Vegas area can't sustain itself with the water available from its Colorado River apportionment, then maybe it shouldn't grow to the point that it outstrips the available resources. Do not permit this project to proceed.

Sincerely,

Joe Sutton
