State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Southern Nevada cannot continue to function under its present strategies, and needs to live within its means. Trying to pipe in water from many miles away simply will not prove to be a long term solution to our water problems.

Sincerely,

John Curry
3416 Winterhaven St
Las Vegas, NV 89108-5081
