Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Please do not put the Great Basin groundwater at risk. Leapfrog development in the Las Vegas area is a bad idea, as it is everywhere. We live in a desert, and whichever part of the state we are in, we must live within our environmental means.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. Judith Simons
