Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. This beautiful Nevada area must be kept pristine for future generations. My husband and I have visited the area many times with my sons and if what you propose comes to fruition, they will not be able to take their children to enjoy the area because the wildlife and natural vegetation will cease to exist without the water that exists there.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Julie D. Ching
