Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area.

It is important to let water stay in the area where it is. Taking it away for human reasons will create a drought in the areas you take it away from.

Los Vegas is about money, greed, gambling and all things unnatural.

Our water is sacred and must be handled with the highest of intelligence and wisdom. What will the changes you are proposing cause to the area you are taking the water away from?

These facts and figures, plus future trouble caused by your decision must be carefully weighed before even thinking about it seriously.

Do what is right for the whole of nature. Humans have the intelligence to move where there is ample water. The majority of earth's microbes,, plants and animals are facing death when you disturb their natural surroundings and most especially their water resources.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.
